

# QUATERNARY RESEARCH

*Quaternary Research* is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its nearly 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.7 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

**Submit manuscripts** online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

**Subscription Information:** *Quaternary Research* published two volumes per year with three issues each. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20<sup>th</sup> Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 91 and 92 (2019): Institutional rate, print only: \$1,447.00 (£1026.00 + VAT). Institutional rate, online only: \$1,420.00 (£1008.00 + VAT). Institutional rate, print and online: \$1,506.00 (£1070.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) if you are in the Americas or [journals@cambridge.org](mailto:journals@cambridge.org) for the rest of the world.

**ISSN:** 0033-5894

RESEARCH ARTICLES

- 1–13 Modern pollen-vegetation relationships along a steep temperature gradient in the Tropical Andes of Ecuador**  
*Kimberley Hagemans, Claudia-Dana Tóth, Manuela Ormaza, William D. Gosling, Dunia H. Urrego, Susana León-Yáñez, Friederike Wagner-Cremer, and Timme H. Donders*
- 14–32 Ecology and paleoenvironmental application of testate amoebae in peatlands of the high-elevation Colombian páramo**  
*Bing Liu, Robert K. Booth, Jaime Escobar, Zhiqiang Wei, Broxton W. Bird, Andres Pardo, Jason H. Curtis, and Jun Ouyang*
- 33–52 A perched, high-elevation wetland complex in the Atacama Desert (northern Chile) and its implications for past human settlement**  
*Luca Sitzia, Eugenia M. Gayo, Marcela Sepulveda, Juan S. González, Lucia Ibañez, Alain Queffelec, and Ricardo De Pol-Holz*
- 53–69 Spatiotemporal patterns of pre-Columbian people in Amazonia**  
*Crystal N.H. McMichael and Mark B. Bush*
- 70–80 New excavations at the late Pleistocene site of Chinchihuapi I, Chile**  
*Tom D. Dillehay, Carlos Ocampo, Jose Saavedra, Mario Pino, Linda Scott-Cummings, Peter Kováčik, Claudia Silva, and Rodrigo Alvar*
- 81–97 First archaeointensity reference paleosecular variation curve for South America and its implications for geomagnetism and archaeology**  
*Avto Goguitchaichvili, Catriel Greco, Rafael Garcia Ruiz, Lucas Pereyra Domingorena, Ruben Cejudo, Juan Morales, Claudia Gogorza, Cristina Scattolin, and Myriam Tarragó*
- 98–108 Mid- to late Holocene cooling events in the Korean Peninsula and their possible impact on ancient societies**  
*Mark Constantine, Minkoo Kim, and Jungjae Park*
- 109–132 Geoarchaeology of Holocene oasis formation, hydro-agricultural management and climate change in Masafi, southeast Arabia (UAE)**  
*Louise Purdue, Julien Charbonnier, Emmanuelle Régagnon, Carine Calastrenc, Thomas Sagory, Clément Virmoux, Mael Crépey, Sophie Costa, and Anne Benoist*
- 133–145 Late onset of the Holocene rainfall maximum in northeastern China inferred from a pollen record from the sediments of Tianchi Crater Lake**  
*Xiaoyan Liu, Tao Zhan, Xinying Zhou, Haibin Wu, Qin Li, Chao Zhao, Yansong Qiao, Shuwei Jiang, Luyao Tu, Yongfa Ma, Jun Zhang, Xia Jiang, Benjun Lou, Xiaolin Zhang, and Xin Zhou*
- 146–164 Late Pleistocene to present lake-level fluctuations at Pyramid and Winnemucca lakes, Nevada, USA**  
*Kenneth D. Adams and Edward J. Rhodes*
- 165–182 Late Holocene paleohydrology of Walker Lake and the Carson Sink in the western Great Basin, Nevada, USA**  
*Kenneth D. Adams and Edward J. Rhodes*
- 183–200 Development of Quaternary travertines in the carbonate mountains of the western Costa del Sol, Málaga, southern Spain**  
*Antonio Guerra-Merchán, Francisco Serrano, José M. García-Aguilar, José E. Ortiz, Trinidad Torres, and Yolanda Sánchez-Palencia*
- 201–215 Influences of forested and grassland vegetation on late Quaternary ecosystem development as recorded in lacustrine sediments**  
*Kendra K. McLauchlan, Ioan Lascu, Emily Mellicant, Robert J. Scharfing, and Joseph J. Williams*
- 216–231 Cosmogenic Cl-36 surface exposure dating of late Quaternary glacial events in the Cordillera de Talamanca, Costa Rica**  
*Rebecca Potter, Yingkui Li, Sally P. Horn, and Kenneth H. Orvis*
- 232–245 Postglacial wetland succession, carbon accumulation, and forest dynamics on the east coast of Vancouver Island, British Columbia, Canada**  
*Terri Lacourse, Kyle W. Beer, Kira B. Craig, and Dante Canil*
- 246–256 A new set of basaltic tephra from Southeast Alaska represent key stratigraphic markers for the late Pleistocene**  
*Paul S. Wilcox, Jason Addison, Sarah J. Fowell, James F. Baichtal, Ken Severin, and Daniel H. Mann*
- 257–271 Bromine as indicator of source of lacustrine sedimentary organic matter in paleolimnological studies**  
*Sergio Ribeiro Guevara, Andrea Rizzo, Romina Daga, Natalia Williams, and Stefania Villa*
