Fahy, Y., Dineen, B., McDonald, C. & Hallahan, B.
The Arts Ability Programme is a partnership between Wexford County Council Arts Department and the HSE.
Aims and Scope: Established in 1982, the Irish Journal of Psychological Medicine is dedicated to acting as an international forum for the publication of research on the science and practice of psychiatry. Its main aim is to disseminate original scientific research to a national and international readership with the objective of improving clinical practice and service development in mental health. The journal advocates for delivering high quality clinical care and improvement in mental health services, and is committed to keeping the field of mental health vibrant and relevant by publishing research on novel topics. Particular strengths and unique features of the Journal include a focus on Clinical Psychiatry, Youth Mental Health and the History of Psychiatry, with regular features and special issues devoted to these topics. The Irish Journal of Psychological Medicine publishes research papers, short reports, review papers, editorials, case reports, historical papers, perspective pieces and book reviews. There are four editions published per year, for which rapid peer review process and publication is considered a priority. The journal regularly publishes special themed editions guest edited by internationally respected academics in a particular research field. With a progressive focus, the journal provides important reading for clinicians, researchers, policymakers and all professionals with an interest in mental health.
