Postexposure Immune Globulin for Needlestick Injuries

Does your hospital protocol for needlestick injuries include the routine use of immune globulin for the injured party when the needle source cannot be tested expeditiously for evidence of hepatitis and human immunodeficiency virus? Prior to widespread testing for hepatitis C antibody, commercial immune globulin had

the potential to provide passive immunity to hepatitis C. This is no longer the case because for the past few years donors positive for hepatitis C have been rejected from the pool from which immune globulin is made. At the most recent meeting of the Centers for Disease Control and Prevention's Advisory Committee on Immuniza-

tion Practices, data were presented that immune serum globulin has little if any prophylactic value for needlestick injuries. It is unclear how long it will take this information to filter down to the "trenches" where treatment decisions are made. Perhaps we as epidemiologists can facilitate this process.

Job Market

There is an opening for a hospital epidemiologist at the Evanston Hospital Corporation, a major Northwestern University Medical School affiliate. The job description and qualifications are as follows.

I. Primary Function:

To organize and implement all infection control activities for the Evanston Hospital Corporation.

II. Specific duties:

1. To act as a consultant and to provide direction for the Associate Hospital Epidemiologist and Nurse Epidemiologists.

2. To review, analyze, and interpret surveillance data provided by infection control personnel.

3. To institute and direct appropriate epidemiologic investigation and/or control measures as

indicated.

4. May act as Chairperson of the Infection Control Committee.

5. To report any pertinent infection control findings to Administration, the Executive Committee of the Professional Staff, and the Chairperson of the involved department.

III. Qualifications:

1. Must be an Attending Physician and member of the Department of Medicine of the Evanston Hospital Corporation.

2. Must be certified by the American Board of Internal Medicine (Infectious Diseases).

3. Must be willing to accept the duties and responsibilities of the position.

4. Must be knowledgeable in or willing to learn the principles of infection control and epidemiology.

Those interested in finding out more about the position should contact E. Stephen Km-tides, MD, Chairman, Department of Medicine, Evanston Hospital Corporation, 2650 Ridge Ave., Evanston, IL 60201; telephone (708) 570-2510; FAX (708) 570-2905.

Brief items of interest for the SHEA News or Newsletter may be sent to C. Glen Mayhall, MD, SHEA, Newsletter Editor, Division of Infectious Diseases, Route 1092; The Former Shriner's Burns Bldg, Room 2-64B; University of Texas Medical Branch; Galveston, TX 77555-1092; FAX (409) 772-6527. Copy should be typed, double-spaced, and should not exceed five pages.

Nursing at UMMC is like
going to a crab feast.

The longer you're there,
the more satisfied you are.

Nursing at UMMC stretches beyond expectation, providing ongoing challenges for the serious and motivated nurse looking for it all. And "all" includes having the means to promote your career and make valued contributions. So it is here, in this 800+ bed, academic teaching facility servicing the state of Maryland and located in downtown Baltimore near the beautiful Harbor, that you will find the kind of personal and professional satisfaction that nukes you want to stay.

INFECTION CONTROL NURSE EPIDEMIOLOGIST

We are seeking a highly motivated nurse to be part of the team that performs surveillance, investigates exposures to communicable diseases and infection outbreaks, and provides infection control education to various disciplines.

This position requires a BSN, a minimum of 3 years of direct patient care experience, infection control experience and excellent communication skills. Certification from APIC is preferred.

For additional information or to apply, please call or send your resume to: Marilyn Nicholson, RNC, BSN, Nurse Recruiter, 22 South Greene Street, Baltimore, MD 21201, (410) 328.5312. We are proud to support an environment of diversity that encourages inquiry from all applicants. EOE. M/F/D/V.

HATSOFF TO FIRST CLASS SERVICE

At SLACK Incorporated we believe our subscribers are first class people. That's why we do everything possible to publish first class journals. And, that's why we maintain a TOLL-FREE CUSTOMER SERVICE HOTLINE. For the first class customer service you deserve, call:

1-800-257-8290

Talk to a SLACK Customer Service Representative about:

Subscriptions. Subscribing by phone is quick and easy, it only takes a minute and Visa and MasterCard are accepted.

Renewals. Early subscription renewal helps avoid possible interruptions in service.

Change of Address. Please notify us four weeks in advance to assure prompt delivery to your new address.

Questions or Problems. Delivery problems or questions about your subscriptions can be handled instantly.

The Society for Healthcare Epidemiology of America

1994SHEA/CDC/AHA Training Course in Hospital Epidemiology

Program

The program will be held September 17-20, 1994 at the Hotel Intercontinental, Chicago, Illinois. Timothy W. Lane, M.D., William Martone, M.D., and Gina Pugliese, R.N., MS., will co-chair the program. Enrollment in the program is limited to 120.

Purpose

This program, developed by the Society for Healthcare Epidemiology of America (SHEA), the Centers for Disease Control and Prevention (CDC), and the American Hospital Association (AHA), is intended for infectious disease fellows and new hospital epidemiologists. It emphasizes hands-on exercises in which participants work in small groups to detect, investigate, and control epidemiological problems encountered in the hospital setting. These work sessions are supplemented with lectures and seminars covering fundamental aspects of hospital epidemiology including epidemiology and surveillance, epidemic investigation, transmission and control of nosocomial infections, disinfection and sterilization, employee health, isolation systems, regulatory compliance, and quality improvement.

Who Should Attend

You should attend if you are a hospital epidemiologist or an infection control practitioner or if you are looking for a course that will provide you the most current information concerning infection control practices and epidemiological methods in health care. This fundamental program will

provide you with the opportunities to find solutions to real situations that will occur in the hospital setting. Intensive problem solving sessions are supplemented with lectures and seminars presented by leading authorities.

Fees

Individual Registrants	4495
Fellows in Infectious Disease	\$350

Credits

The Centers for Disease Control and Prevention (CDC) is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians.

The Centers for Disease Control and Prevention designates this continuing education activity for up to 21 hours in Category 1 of the Physician's Recognition Award of the American Medical Association.

General Course Information

Information regarding the schedule, hotel and travel accommodations, discount airfare, and course fees are available from SHEA (609) 845-1720.
