Ecological Aspects of Parasitology
edited by C. R. KENNEDY.

This comprehensive treatise discusses: the particular ecological problems facing parasites and the general nature of the solutions adopted by them; the problems facing parasites living in a range of organ systems, and the detailed ways in which they have coped with them; and the problems associated with the interaction of host and parasite populations.

Biochemistry of Parasites and Host-Parasite Relationships
Proceedings of the Second International Symposium on the Biochemistry of Parasites and Host-Parasite Relationships, Beerse, Belgium, 28 June - 1 July 1976
Organized by the Janssen Research Foundation
edited by H. VAN DEN BOSSCHE.

An evaluation is made of current knowledge of protozoan and helminthian biochemistry, immunology, and the use of antiparasitic drugs as biochemical probes is discussed.

Biochemistry and Cytology of Plant-Parasite Interaction
edited by K. TOMIYAMA, J. M. DALY, I. URITANI, H. OKU and S. OUCHI.

Gathers together up-to-date research results on the induction mechanisms of plant tissue responses to invasion by pathogens. Topics discussed include the mechanisms of phytoalexin induction, parasite recognition by plant cells and defense action, and the physiological and biochemical processes involved.
