Child abuse and child protection
A guide for health, education and welfare workers
by Dr Chris Goddard

The introduction of mandatory reporting has meant that pressures on nurses, teachers, social workers, doctors and others whose work brings them into contact with children have never been greater. Yet there has been little Australian material available for these health, education and welfare professionals.

The first part of this book provides information for practitioners and students on the changes that brought about the discovery of child abuse and neglect, how child abuse is defined, the size of the problem, and its causes and effects. The second part seeks to assist workers in responding to the problem by examining reporting laws, and by offering practical advice on making referrals, working with families and children, assessments, case conferences and appearing in court.

Dr Chris Goddard, Associate Professor Social Work at Monash University, worked several years at the Royal Children’s Hosp in Melbourne, where he assisted in establishment of the child protection team. has written widely on the subject of cl abuse and child protection in professic journals and the broader media.

Profile of Young Australians
Facts, figures and issues

Edited by Peter Boss, Sue Edwards and Susan Pitman
with a foreword by Dr Frank Oberklaid

Published by Churchill Livingstone, May 1995, 352pp, graphs, charts, tables

This is the first ever comprehensive compilation and analysis of statistical data detailing the status of young people in Australia. It is a national profile which provides a balanced picture of how young people are placed in our society and the nature of opportunities available to them.

Contents
Chapters include: Substitute care and adoption; Child families and finances; Non-parental care of children; Child and their families; Health; Child maltreatment & protect Juvenile justice; Homeless youth; Recreation; Education; W force participation.

Oz Child Information Service

The Oz Child Information Service is a comprehensive, efficient and personalised service designed specifically to meet the information needs of human service professionals, researchers, workers and students in the child and family area. It provides current information which is targeted, in-depth and easily accessible.

The Collection

The basis of the Information Service is a specialised collection of over 5000 books, about 250 videos, and approximately 120 journal subscriptions, from Australia and overseas. All books and videos are included on the Information Service database, as are abstracts of all relevant journal articles, forming the basis of a powerful information resource of almost 32,000 items.

The Services

Access to information is on a subscription basis and, depending on requirements, there are a number of subscription types. Whilst subscribers are welcome to visit the Information Service, most of our services are provided via mail, fax and telephone both locally and interstate.

*Nexus* is the Information Service’s principal vehicle for the dissemination of information. It is published monthly and contains abstracts of about 200 articles drawn from the current issues of journals, grouped under broad subject categories and including keywords for easy identification of relevant topics. Photocopies of the full text of any articles can be requested. *Nexus* also contains listings of newly acquired books and videos, which are available for loan.

Database searches are available, either on a subscription basis or as a one-off request, for information on specific topics. The Information Service database includes all books and videos in the collection, as well as the cumulated resource of journal articles indexed for *Nexus* over many years. Again, full text photocopies of articles can be requested, and books and videos can be borrowed.

To receive further details about the Oz Child Information Service, please complete and return the form below.
