Applied and Preventive Psychology
Current Scientific Perspectives
Editor: Samuel Osipow, Ohio State University

Applied and Preventive Psychology was launched in 1992 to promote the integration of science and public interest with the practice of psychology. This review journal is intended for the "scientist-practitioner."
Vol. 5, 1996 (Quarterly, ISSN 0962-1849)

Behavioral and Brain Sciences
An International Journal of Current Research and Theory with Open Peer Commentary
Editor: Stevan Harnad, Princeton University

Behavioral and Brain Sciences is the internationally renowned journal with the innovative format "Open Peer Commentary." BBS features a fascinating and unique forum that contributes to the communication, criticism, stimulation, and unification of research in its field.
Vol. 19, 1996 (Quarterly, ISSN 0140-525X)

Development and Psychopathology
Editor: Dante Cicchetti, University of Rochester, Mt. Hope Family Center
Deputy Editor: Barry Nurcombe, Vanderbilt University College of Medicine

This multidisciplinary journal is devoted to the publication of original, empirical, theoretical and review papers which address the interrelationship of normal and pathological development in adults and children.
Vol. 8, 1996 (Quarterly, ISSN 0954-5794)

Psychological Medicine
Editor: Eugene Paykel, University of Cambridge, Department of Psychiatry

Psychological Medicine publishes original research in clinical psychiatry and the basic sciences related to it. Authoritative articles provide up-to-date surveys of recent findings and issues, and offer an historical and interdisciplinary perspective not often found in more traditional journals.
Vol. 26, 1996 (Bimonthly, ISSN 0033-2917)

Psychological Science
Editor: John Kihlstrom, University of Arizona, Tucson

Psychological Science is a forum for research, theory and application in psychology and the closely related behavioral, cognitive, neural and social sciences. The journal also covers psychology in government and public affairs.
Vol. 7, 1996 (Bimonthly, ISSN 0956-7976)

Psychophysiology
An International Journal
Editor: John T. Cacioppo, Ohio State University

This prestigious international journal plays a key role in advancing psychophysiological science. The premier journal in its field, it publishes new theoretical, empirical and methodological papers of the highest standards, covering research on the interrelationships between the physiological and psychological aspects of behavior.
Vol. 33, 1996 (Bimonthly plus abstracts supplement, ISSN 0048-5772)

HUMAN BRAIN FUNCTION: Assessment and Rehabilitation
Series Editors: Antonio E. Puente, Gerald Goldstein, and Erin D. Bigler

NEUROIMAGING • edited by Erin D. Bigler
This sweeping new resource in two volumes examines the current status of brain imaging technologies and their use in investigations of human brain function. The field's foremost experts thoroughly investigate the role of neuroimaging in behavior studies, and focus on magnetic resonance imaging, major imaging techniques, and clinical syndromes. Outstanding contributions — accompanied by more than 600 illustrations, color plates, and a comprehensive atlas of the brain based on MRI images — offer the latest information in this expanding field.

Volume I: Basic Science
Included among the topics are • MRI analysis • PET studies of cognition • cerebral asymmetries and corpus callosum morphology • magnetoencephalography, and • neurobehavioral probes as applied to physiologic neuroimaging studies.

Volume II: Clinical Applications
A sampling of the topics includes • neuromaging in neurologic disorders • neuromaging in psychiatric disorders • PET neuromaging in dementia • MRI and memory disorders, and • functional MRI.

Genetics and Mental Illness
Evolving Issues for Research and Society
edited by Laura Lee Hall
"The greatest strength of this book is the variety of perspectives it applies to the questions raised by psychiatric genetics. It will—and should—jar the academic...into seeing the broader picture."
—Nature

Forthcoming in 1997!
AIDS AND BEHAVIOR
Editor: Thomas L. Patterson
Deputy Editor: Igor Grant
Provides a new forum for the timely exchange of information on the neurobehavioral factors in the initial spread, behavioral consequences, and social impact and response to HIV Infection.
Subscription: Volume 1, 1997 (4 Issues)
Institutional rate: $150.00 in US/$175.00 elsewhere
Personal rate: $50.00 in US/$59.00 elsewhere

New editor!
NEUROPSYCHOLOGY REVIEW
Editor: Antonio E. Puente
Publishes integrative review papers on substantive topics in basic and clinical neuropsychology, behavioral neurology, and clinical psychology and psychiatry.
Subscription: Volume 6, 1996 (4 issues)
Institutional rate: $150.00 in US/$175.00 elsewhere
Personal rate: $41.00 in US/$48.00 elsewhere

The most widely prescribed group of psychotropic drugs, neuroleptics, clinical and neurobiological aspects of tardive dyskinesia and related disorders are the most serious. This book deals with historical, schizophrenia, as well as other psychoses. However, neuroleptics are indispensable in the management of a majority of patients with movement disorders such as parkinsonism, dystonia and akathisia. This book covers neuroanatomical, developmental, cognitive and genetic research and theory as they relate to schizophrenia and other psychoses.

A complete overview of multiple sclerosis for the internist, general neurologist and therapist. Including recent research findings in genetics, immunology and pathophysiology, the authors provide reliable and up-to-date guidance on the epidemiology, diagnosis, prognosis and treatment of MS. Of particular interest to neuroscientists and neurologists will be the reviews of experimental models of MS, pathology of the demyelinated plaque, HLA associations and the role of immune mechanisms. The clinical sections of the book include discussion of neurological, sexual, psychological and cognitive disturbances, and rehabilitation measures.

Accurate diagnosis of the cause of ineffective communication in the preschool child is not possible simply through use of standard neurological and medical examinations. Distinguishing language limited disorders from those concomitant with mental deficiency or autism requires careful attention to a wide range of behavior patterns, study of creative play and analysis of neuropsychologic and language tests. This volume presents the results of one of the largest multidisciplinary studies which considers the practical problems of diagnosis through use of these different criteria.

RESEARCH ARTICLES

375 Neuropsychological Correlates of Learning Disability Subtypes in Children with Tourette's Syndrome
K.O. Yeates and R.A. Bornstein

383 Spontaneous and Posed Facial Expression in Parkinson's Disease
M.C. Smith, M.K. Smith, and H. Ellgring

392 The Influence of Pattern Type on Children's Block Design Performance
N.A. Akshoomoff and J. Stiles

SYMPOSIA

403 Varieties of Neglect
L.S. Cermak

THEMATIC ARTICLES

404 Effects of Left-Sided Movements on Line Bisection in Unilateral Neglect
K-C. Lin, S.A. Cermak, M. Kinsbourne, and C.A. Trombly

412 Hemispheric Antagonism in Visuo-Spatial Neglect: A Case Study
J.C. Marslen-Wilson and P.W. Halligan

419 Perceptual and Premotor Components of Unilateral Auditory Neglect
R. Sterzi, S. Piacentini, M. Polimeni, F. Liverani, and E. Bisiach

426 Anosognosia for Hemiplegia, Neglect Dyslexia, and Drawing Neglect: Clinical Findings and Theoretical Considerations
A. Berti, E. Ladavas, and M. Della Corte

441 Assessment of Neglect Reveals Dissociable Behavioral but not Neuroanatomical Subtypes

452 Modulation of Neglect Hemianesthesia by Transcutaneous Electrical Stimulation
G. Vallar, M.L. Rusconi, and B. Bernardini

CASE STUDY

460 Neuropsychological Functioning in a Patient with Paraneoplastic Limbic Encephalitis
R.C. Martin, M.W. Haut, K. Goeta-Kreisler, and D. Blumenthal

LETTER TO THE EDITOR

467 Paying Attention to the Stroop Effect?
A. Henik
