Aims and Scope: The International Journal of Technology Assessment in Health Care has as its specific scope of interest the evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community—the experience of different countries in their encounter with health care technology, viewed comparatively, is available to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The Journal does not accept footnotes or appendices.

Cover Sheet and Cover Letter. A cover sheet, signed by all authors, must attest that 1) each author contributed to the conception and design of the study or analysis, the execution and interpretation of data, and the writing of the paper; 2) each has approved the version being submitted; and 3) the content has not been published nor is being considered for publication elsewhere.

As relevant to the content of the paper, the letter should also attest to the fact that any research with human or animal subjects conforms to the ethical and legal standards of the country in which it was performed. All authors must disclose any financial arrangements with companies whose products are discussed in the paper or their competitors; such information will not be revealed to reviewers but may be included in a suitable format in the final publication if the manuscript is accepted.

Cite the Journal of Technology Assessment in Health Care on all your reprints. The cover sheet should list:

1) the article’s full title;
2) a short title (50 characters or less) for the running head
3) the name of the corresponding author and his/her affiliation
4) complete mailing address,
5) telephone number, and
6) e-mail address.

Abstract and Keywords. A 100- to 250-word abstract, submitted on a separate page, should provide a brief summary of the article’s major arguments and/or results, and its conclusions/recommendations. Abstracts must be submitted in four sections: Objectives, Methods, Results, and Conclusions. If possible, these should be indented by 5 spaces. Manuscripts are evaluated by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 6 months. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English.

Preparation of Manuscript. The manuscript, including all references, must be provided in Word or RTF format, double spaced on 8½ × 11 inch or A4 page sizes, with at least 1-inch (2.54 cm) margins. Manuscripts should typically have less than 4,000 words, including the abstract of 250 words maximum, and usually no more than 25 references. Manuscripts should be double spaced, and all references must be cited in the text. All abbreviations used in each table and figure must be defined when they first appear in the text. All tables and figures must have a caption and must be cited in the text. The use of product trade names should be clearly spelled out on first use. The use of proprietary brands is essential to the manuscript.

Table of Contents. The table of contents must include a paragraph on the article’s major arguments and/or results, and its conclusions/recommendations. Abstracts must be submitted in four sections: Objectives, Methods, Results, and Conclusions. If possible, these should be indented by 5 spaces. Manuscripts are evaluated by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 6 months.
