Bulletin of Entomological Research

Volume 108
Issue 4
August 2018

Research Papers

X. Zhang, T. Pengsakul, M. Tukayo, L. Yu, W. Fang and D. Luo
Host-location behavior of the tea green leafhopper Empoasca vitis Göthe (Hemiptera: Cicadellidae): olfactory and visual effects on their orientation

Sulfur fertilization increases defense metabolites and nitrogen but decreases plant resistance against a hostspecific insect

J. Kot, A. Judaszkiewicz, M. Karauś and U. Złotek
Biochemical responses induced in galls of three Cynipidae species in oak trees

A. Sharifloo, A. Zibaee, J. Jalali Sendi and K. Talebi Jahroumi
Biochemical characterization a digestive trypsin in the midgut of large cabbage white butterfly, Pieris brassicae L. (Lepidoptera: Pieridae)

Molecular cloning of heat shock protein 10 (Hsp10) and 60 (Hsp60) cDNAs from Galeruca daurica (Coleoptera: Chrysomelidae) and their expression analysis

V. Scicchitano, F. Dedeine, B. Mantovani and A. Luchetti
Molecular systematics, biogeography, and colony fusion in the European dry-wood termites Kalotermes spp. (Blattodea, Termitidae, Kalotermitidae)

A.M. Gárdena, P. Gallardo and D. Toledo
Suitability of multiple Mediterranean oak species as a food resource for Reticulitermes grassei (Isoptera: Rhinotermitidae)

Biology of two larval morphological phenotypes of Aedes aegypti in Abidjan, Côte d’Ivoire

Assessing resistance of sugarcane varieties to sugarcane borer Diatraea saccharalis (Lepidoptera: Crambidae)

Anatomical, morphological, and physiological responses of two sugarcane genotypes of contrasting susceptibility to Mahanarva fimbriolata (Hemiptera: Cicadellidae)
Aims and Scope
Established in 1910, the internationally recognised Bulletin of Entomological Research aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The Bulletin publishes high quality and original research papers, critiques and review articles concerning insects or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry; and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The Bulletin does not publish the results of pesticide testing or traditional taxonomic revisions.

Stylist of Paper
Bulletin of Entomological Research publishes two types of paper:

- Full research papers
- Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication. We also welcome “Letters to the Editor” with comments on recently published papers.

Manuscript Preparation

Language
Manuscripts should be in English.

Abstract
Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- The text, divided under appropriate headings. Clearly differentiate between primary (bold, large font size), secondary (bold, text font size) and tertiary (italics) headings
- Acknowledgements (if any)
- References (for further information about presenting references please see below)
- Tables, either at the end of the manuscript or as separate files. Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.
- Illustrations should be submitted as separate files in TIFF or EPS format but captions should be listed at the end of the manuscript text.

Abstract
Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References
References must be based on the name and year system, give full journal titles and conform to the following style:

Proceedings

Please list papers by more than two authors, but with the same first author. If the first author is the title. If this is long, the title should appear in the form: Thiery (2014) or (Thiery, 2014). Authors should be cited in chronological order as: (Jervis et al., 2015; Krishnai & Walker, 2010).

Tables
Tables should be in a simple form and should not be used if it is at all possible to give the information in text. They cannot be submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript. Each table must have a clear and concise caption.

Illustrations
Illustrations should be submitted in TIF or EPS format at appropriate final publication size. Resolution of artwork should be at the following minimum resolutions: Line art (black & white), 1200dpi; Combination, i.e. line+grey (grey-scale), 800dpi; Black & White halftones (grey-scale), 300dpi; Colour halftones, 300dpi. Comprehensive guidance on creating suitable electronic artwork is available at http://ds-photos.com/guidelines/digital-art.html where you will find extensive guidelines on preparing electronic figures. An online prelighting tool (http://ds-photos.com/submit.html) is also available when you can check if your figures are suitable for reproduction. Captions should be listed at the end of the manuscript text.

Supplementary Material
Additional information which due to its nature does not lend itself to print media (example: full data sets, movie or sounds files etc.) may be submitted for online-only publication. Please see full details (“Instructions for Contributors”) at journals.cambridge.org/ber.

Technical and Nomenclature Standards
All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

Manuscript Submission
We kindly ask that you follow the instructions below when preparing your manuscript for submission. This will minimize the risk of errors being introduced during the publishing process.

- Use double-line spacing and ample margins (at least 2.5cm) on each side.
- Do not underline anything.
- Number each line consecutively across the pages of the manuscript, rather than within pages.
- Number every page (preferably the top right corner).
- Do not indent at the start of each paragraph.
- Use italics for taxonomic nomenclature and bold for headings.
- Use standard abbreviations for unit names such as cm, kg and SI units.
- Use British rather than American spellings and ‘z’ rather than ‘s’ spellings in words with ‘ze’.

Voucher specimens
The deposition of voucher specimens should be considered when appropriate.

Offprints
Authors will be supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the Bulletin and has not been previously published elsewhere.

Proofs
Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

Submission
The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper clipsrrents are available for a fee and should be ordered at proof stage.
Research Papers

X. Zhang, T. Pengsakul, M. Tukayo, L. Yu, W. Fang and D. Luo
Host-location behavior of the tea green leafhopper Empoasca vitis Göthe (Hemiptera: Cicadellidae): olfactory and visual effects on their orientation

P. Rempoulakis, S. Sela (Saldinger), E. Nemny-Lavy, R. Pinto, A. Birke and D. Nestel
Microbial composition affects the performance of an artificial Tephritid larval diet

N. Gunathilaka, T. Ranathunge, L. Udayanga, A. Wijegunawardena and W. Abeywickrema
Oviposition preferences of dengue vectors; Aedes aegypti and Aedes albopictus in Sri Lanka under laboratory settings

M.D. Cooling, B.D. Hoffmann, M.A.M. Gruber and P.J. Lester
Indirect evidence of pathogen-associated altered oocyte production in queens of the invasive yellow crazy ant, Anoplolepis gracilipes, in Arnhem Land, Australia

J. Rull, E. Tadeo, R. Lasa and M. Aluja
The effect of winter length on duration of dormancy and survival of specialized herbivorous Rhagoletis fruit flies from high elevation environments with acyclic climatic variability

M. Matsukawa, Mikako Tasaki, Kazuyuki Doi, Kasumi Ito, Kazuhito Kawakita and Toshiharu Tanaka
Regional population differences of the brown planthopper (Nilaparvata lugens Stål) in Cambodia using genotyping-by-sequencing

Sulfur fertilization increases defense metabolites and nitrogen but decreases plant resistance against a host-specific insect

J. Rozsypal, M. Moos and S.G. Goto
Cold acclimation increases cold tolerance independently of diapause programing in the bean bug, Riptortus pedestris

I. Kot, A. Jakubczyk, M. Karas and U. Złotek
Biochemical responses induced in galls of three Cynipidae species in oak trees

A. Sharifloo, A. Zibae, J. Jalali Sendi and K. Taleb Jahroumi
Biochemical characterization a digestive trypsin in the midgut of large cabbage white butterfly, Pieris brassicae L. (Lepidoptera: Pieridae)

Molecular cloning of heat shock protein 10 (Hsp10) and 60 (Hsp60) cDNAs from Galeruca daurica (Coleoptera: Chrysomelidae) and their expression analysis

V. Scicchitano, F. Dedeine, B. Mantovani and A. Luchetti
Molecular systematics, biogeography, and colony fusion in the European dry-wood termites Kalotermes spp. (Blattodea, Termitoidae, Kalotermitidae)

A.M. Cárdenas, P. Gallardo and D. Toledo
Suitability of multiple Mediterranean oak species as a food resource for Reticulitermes grassei Clément (Isoptera: Rhoenetinidae)

Biology of two larval morphological phenotypes of Aedes aegypti in Abidjan, Côte d’Ivoire

Assessing resistance of sugarcane varieties to sugarcane borer Diatraea saccharalis Fab. (Lepidoptera: Crambidae)

C.G. Melo, A.C. Tomaz, B.O. Soares, K.N. Kuki, L.A. Peternelli and M.H. Pereira Barbosa
Anatomical, morphological, and physiological responses of two sugarcane genotypes of contrasting susceptibility to Mabanaarva fimbriolata (Hemiptera: Cercopidae)
