Prevolnik Rupel: HTA in Slovenia
Benisheva-Dimitrova et al.: HTA of medicinal products in Bulgaria
Scintee and Ciutan: Development of HTA in Romania
Huic et al.: HTA in Croatia
Atanasiević and Zahi: HTA in Serbia
Guzvic et al.: HTA in Bosnia and Herzegovina
Kani et al.: Potential of HTA in Greece
Kahveci et al.: Health technology assessment in Turkey
The focus of the journal is the international health care community. The experience of different countries in their encounter with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts benefits the whole. The use of technology in health care has created some of the major issues discussed in the journal. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

Aims and Scope: The International Journal of Technology Assessment in Health Care has as its specific scope of interest, the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the need for those interested in the complexities of interaction between people and technology, technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The use of technology in health care has created some of the major issues discussed in the journal. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts benefits the whole. Theme: HTA in Central-Eastern-Southern Europe

CONTENTS

Editorial
331 HTA in Central-Eastern-Southern Europe: Finding its way to health policy
Anna Zawada and Marjukka Mäkelä

Theme Submissions
333 Overview on the current implementation of Health Technology Assessment in the healthcare system in Hungary
Bertalan Németh, Marcell Csanádi and Zoltán Kaló
339 Health Technology Assessment in evaluation of pharmaceuticals in the Czech Republic
Lenka Vostalová, Jana Mazelová, Jiří Samek and Milan Vöcelka
345 Introduction of Health Technology Assessment for medicines in Slovakia
Tomas Tesar, Adam Hloska, Martin Wawruch, Lubica Lehocka, Miroslava Šnokova and Lucia Masarykova
350 A decade of Health Technology Assessment in Poland
Iga Lipska, Neil McAuslane, Hubert Leufkens and Anke Hölves

Letter to the Editor
358 Some additional thoughts on forthcoming amendments to HTA in Poland
Anna Zawada

Theme Submissions
360 Current implementation of Health Technology Assessment in healthcare system in Slovenia
Valentina Prevolnik Rupel
365 Pricing, reimbursement, and Health Technology Assessment of medicinal products in Bulgaria
Tatyana Benisheva-Dimitrova, Dobriana Sidjimova, Daniela Cherneva and Nikolay Kralimarkov
371 Development of Health Technology Assessment in Romania
Silvia Gabriela Scintee and Marius Ciutan
376 Health Technology Assessment in Central, Eastern, and South European countries: Croatia
Mirjana Huic, Romana Tandara Hacek and Ivan Svajger
384 Health Technology Assessment in Serbia
Dragana Atanasijevic and Vladimir Zah
390 Health Technology Assessment in Central-Eastern and South Europe Countries: Bosnia and Herzegovina
Vladimir Guzvic, Tarik Catic and Marina Kostic
396 Current environment for introducing Health Technology Assessment in Greece
Chara Kani, Vasilios Kourafalos and Panagiota Litsa
402 Health Technology Assessment in Turkey
Rabia Kahveci, Esra Meltem Koç and Emine Özer Küçük
