New from Princeton

Technological Change and the British Iron Industry, 1700-1870

Charles K. Hyde

Costs, prices, profits, shrewd leaders, competition, new inventions, and productivity all figure in this comprehensive survey of the technological change in a key industry during the Industrial Revolution. "An important contribution to British economic history: it has rewritten the history of the iron industry by exploiting a great mass of primary sources in a quantitative way." — *Donald N. McCloskey, University of Chicago* \$18.50

British Rearmament in the Thirties

Politics and Profits

Robert Paul Shay, Jr.

Here is a comprehensive analysis of rearmament under the Baldwin and Chamberlain governments. It reveals the primary determinants of events and provides important new information regarding the principal considerations underlying Chamberlain's policy of appeasement. "A lucid dissection of a modern democratically based, bureaucratic government floundering in the face of crisis. . . . A deft blend of economic, political, and military history." — *Library Journal* Illus. • \$18.50
