doi:10.1017/jpa.2020.105, Published by Cambridge University Press, 10 February 2021

In the recently published paper by M. Moczydłowska et al. (2021), the new fossil genus *Fistula* Moczydłowska in Moczydłowska et al. (2021), and new species *Fistula crenulata* Moczydłowska in Moczydłowska et al. (2021) were described. The generic name *Fistula* appeared to be taken and is homonym of a living mollusk *Fistula* Moerch, 1853 as cataloged in Nomenclator Zoologicus, uBio ZSL (Zoological Society of London). I provide herein the corrected new name to replace the homonymous name for the fossil genus as *Silicofistula* Moczy-

dłowska, 2021, and species *Silicofistula crenulata* Moczydłowska, 2021. I thank D. Campbell (Geology Department of Natural Sciences, Gardner-Webb University, U.S.A.) for spotting the homonym name, and G. Vermeij for suggesting new name.
