Boxes

4.1 Two examples of local good antimicrobial stewardship practices  
5.1 Challenges in categorizing antibiotics as therapeutic, metaphylactic, or prophylactic  
5.2 Examples of responses to antibiotic reduction  
5.3 Reduction of antibiotic consumption through direct guidelines  
5.4 Surveillance of antibiotic consumption and sales data  
5.5 Animal to human transfer of antibiotic-resistant strains  
5.6 Importance of cost–benefit of biosecurity reporting  
7.1 Summary of diagnostic innovations urgently needed to reduce misuse of antibiotics  
7.2 Selected examples of AMR surveillance networks  
7.3 Summary of AMR surveillance innovation needed
