144 The Journal of Laryngology and Rhinology.

In most of these asthmatic persons there was no general condition of nervousness, such as hysteria, etc., though long-standing asthma, with its production of insomnia, may lead to considerable general nervousness. In a few cases the onset of symptoms could be traced to some severe illness. In the majority of cases the pathological reflex irritability of the respiratory centre must be supposed to have originated in a different manner, and usually after catarrh of long standing, during which period the patients have suffered from violent sneezing, which have at last affected the reflex irritability of the medulla oblongata. A special predisposition to asthma has, however, to be assumed. The symptoms which imply a connection between asthmatic attacks and diseases of the nasal cavity are discussed by Schmiegelow, and some useful rules for treatment are given.

We can cordially recommend the book, especially to the general practitioner. It is well and easily written, with few faults in the English, is not too long, and is a useful and scientific contribution to a question which has agitated the minds of rhinologists ever since the production of Hack's work. Those in general practice cannot fail to derive much help from the work—assistance which is often sorely needed in a class of case which, apparently simple, is distressing enough to the patient, and often baffles all ordinary therapeutic measures. The educated physician need not be ashamed to acknowledge that he can read, mark, learn, and digest, and profit from such rhinological works as this.

NEW PREPARATIONS.

Lanoline Toilet Soap.

Ichthyol Lanoline Soap, (Burroughs, Wellcome, & Co.)

We have received samples of the above from this well-known firm, and have submitted them to trial. As to the toilet soap we can confidently say that we have found no more pleasant soap for general use. The hard London water is rendered quite soft with this soap, and the remarks of the inventors that the skin is rendered soft, clear, and elastic, "by the absorption of unsaponified lanoline "from the water which takes the place of the fat removed from the skin by the "alkali," is fully borne out by our experience. We think Lanoline Toilet Soap more pleasant to use than any similar article we have met with, and it is fully equal or even superior for toilet purposes to the best and most expensive French soaps. We have no doubt that it will meet with a ready sale. We have no doubt that the Ichthyol Soap will be found serviceable in skin affections and rheumatism, for which purposes the therapeutic value of ichthyol is well known. These soaps contain ten per cent. of ichthyol, and ten per cent. of lanoline.

Golden Maltex, Pascall.

WE have received samples of the above preparation. By this application of confectionery to medicine, some of the horrors of physicking are done away with. Allen and Hanbury's Malt Extract is done up in neat little golden bags, in the form of elegant sweetmeats, which scarcely the most refractory patient can refuse to take. They might easily be passed off as "Everton toffee," and are certainly a most artistic device. The purity of the malt is guaranteed by the preparation used. Children will, no doubt, find it much more pleasant to devour these lozenges than to take the same thing out of a spoon and bottle.

Witherby & Co., Printers, 326, High Holborn, London, W.C.

INDEX TO VOL. IV., 1890.

А.

- ABDUCTOR paralysis of the larynx of uncertain origin, two cases of, 436 Abductors of the vocal cords, bilateral
- paralysis of the, 34, 224, 523 Abortive treatment of acute catarrh of the
- nose and throat, 160

Abscess of the frontal sinus, simulating lesions of the orbital cavity, 337 Accessory cavities of the nose, the diagnosis

and treatment of the diseases of the, 480 Acromegaly, case of, 398

- Adenoid growths, a cause of deaf mutism, 28; in the adult, 292; complications consecutive to ablation of, 293; adenoid tissue at the vault of the pharynx, acute and chronic enlargements of, 77; the naso-pharynx and pharynx, 536; tumours, co-existence of cleft palate with, 293; vegetations at different ages of life, 523
- Adhesions between the soft palate and pharyngeal walls, and method of correcting, 117.
- Administration of certain drugs by electricity, 201
