BUCKLE, A. P. Field trials of flocoumafen against warfarin-resistant infestations of the Norway rat (<i>Rattus norvegicus</i> Berk.)	467
PARSHAD, V. R. and CHOPRA, G. The susceptibility of <i>Rattus rattus</i> and <i>Bandicota bengalensis</i> to a new anticoagulant rodenticide, flocoumafen	475
KYRIAZOPOULOU-DALAINA, V. Poliovirus antibody in Northern Greece	479
SUNTHARASAMAI, PRAVAN, PORNTHEP, CHANTHAVANICH, WARRELL, M. J., LOOARE-ESUWAN, SORNCHAI, KARBWANG, JUNTRA, SUPANARANOND, WICHAI, PHILLIPS, R. E. JANSAWAN, WEERAPOL, XUEREF, C., POURADIER-DUTEIL, X. and WARRELL, D. A. Purified Vero cell rabies vaccine and human diploid cell strain vaccine: comparison of neutralizing antibody responses to post-exposure regimens	483

YEOH, E. K., LAI, C. L., CHANG, W. K. and LO, H. Y. Comparison of the immunogenicity, efficacy and safety of 10 μ g and 20 μ g of a hepatitis B vaccine: a prospective randomized trial	491
FRANCIS, M. J. and BLACK, L. Humoral response of pregnant sows to foot and mouth disease vaccination	501
BEYER, WALTER E. P., VAN DER LOGT, JOS T. M., VAN BEEK, RUUD and MASUREL, NIC. Immunoglobulin G, A and M response to influenza vaccination in different age groups: effects of priming and boosting	513
FLAEGSTAD, TROND, TRAAVIK, TERJE and KRISTIANSEN, BJORN-ERIK. Age-dependent prevalence of BK virus IgG and IgM antibodies measured by enzyme-linked immunosorbent assays (ELISA)	523
ABU ELZEIN, E. M. E. Recovery of bluetongue virus serogroup from sera collected for a serological survey from apparently healthy cattle, from the Sudan	529
HARESNAPE, J. M. and MAMU, F. D. The distribution of ticks of the <i>Ornithodoros moubata</i> complex (Ixodoidea: Argasidae) in Malawi, and its relation to African swine fever epizootiology	535
AVILLEZ, MARIA FRANCISCA and PAIXÃO, MARIA TERESA. Excretion of faecal viruses during the first year of life including attendance at a day nursery in Lisbon, Portugal	545
REILLY, SHEENA, DHILLON, B. J., NKANZA, KAMONA, M., D'SOUZA, ANNETTE M., TAYLOR, N., HOBBS, SANDRA J., FREKE, A. and ROOME, A. P. C. H. Adenovirus type 8 keratoconjunctivitis – an outbreak and its treatment with topical human fibroblast interferon	557

NOTES FOR CONTRIBUTORS

Papers for publication should be sent to Professor J. R. Pattison, Faculty of Clinical Sciences, School of Medicine, University College London, University Street, London WC1E 6JJ. The typescript and two copies should be sent with 3 copies of all tables and illustrations. Authors are requested to include a self addressed envelope for acknowledgement of receipt. Papers forwarded to the Editor for publication are understood to be offered to the *Journal of Hygiene* alone, unless the contrary is stated.

General

Careful preparation of manuscripts will promote rapid publication. Authors are advised to refer to a recent issue of the journal in addition to the notes below, paying particular attention to the form of references, tables and figures and the use of symbols and abbreviations. Papers should be in double-spaced typescript throughout (including reference lists, footnotes and legends) on A4 paper with a left hand margin of at least 4 cm.

Format

Papers must commence with a separate title page indicating the full title, initial(s), surname(s), address(es) of the authors and a short title not exceeding 45 characters. Papers should usually be divided into SUMMARY, INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION and REFERENCES. Some observations are best described in the form of a continuous narrative with the only subsection being a Summary at the beginning. Such papers will also be considered.

Acknowledgements are put at the end of the discussion after a space of one line.

Tables

Tables should be numbered separately with arabic numerals and each table typed on a separate sheet of paper. Whenever possible they should be so designed that they can be printed across the width of a page. Note that columns and lines are not separated by vertical or horizontal lines but are grouped by the use of braces of varying lengths.

Illustrations

Line drawings, diagrams and charts should be accurately drawn on plain white board or paper or faintly blue-lined graph paper and should not be more than twice publication size. Points should be indicated by the following symbols: ○, △, □, ●, ■. Lettering and numbering will not be directly reproduced but should be clearly shown either in pencil on the drawing or on overlaid transparent paper.

Photographs should be sent as unmounted glossy prints with good contrast. Their position in the text should be indicated by 'Figure... near here'.

Legends for figures should be typed on separate sheets of paper. Each illustration should bear on the back the author's name and illustration number.

References

In the text references by up to three authors are cited in the form Jones, Smith & Brown (1950) and those by four or more authors in the form Jones *et al.* (1950).

The reference list must be in double-spaced typescript, should be arranged alphabetically and should include authors' names, initials, year of publication in parentheses, title of the paper, name of the journal *in full*, the volume number and first and last page numbers. References to books and monographs should be in the form: authors' names, initials, year of publication in parentheses, title, edition editors (if appropriate), page number(s), place of publication and publisher. The authors should pay particular attention to the format and punctuation of the following examples:

ANDERHUB, B., PITT, T. L., ERDMAN, Y. J. & WILLCOX, W. R. (1977). The comparison of typing methods for *Serratia marcescens*. *Journal of Hygiene* 79, 89-102.

DUBEY, J. P. (1977). *Toxoplasma*, *Hammondia*, *Besnoitia*, *Sarcocystis*, and other tissue cyst-forming Coccidia of man and animals. In *Parasitic Protozoa*, vol. III (ed. J. P. Kreier), pp. 101-237. New York: Academic Press.

MARTIN-LUENGO, F., LOPEZ-AZORIN, F. & BERNAL, M. (1981). Activity of nine cephalosporins against *Nocardia asteroides*. *Proceedings of the 12th Interscience Congress of Chemotherapy* (ed. P. Periti and G. G. Grassi), pp. 367-368. Washington, D.C.: American Society for Microbiology.

MUNDAY, B. L. (1969). The epidemiology of toxoplasmosis with particular reference to the Tasmanian environment. M.V.Sc. thesis, University of Melbourne.
