NOTES FOR CONTRIBUTORS

Language Variation and Change publishes original research reports that are based on data of language production, either oral or written, from contemporary or historical sources. Articles that synthesize or reanalyze a number of research findings on substantive issues will also be considered. Conforming to scientific methodology, the reported findings should be fully replicable from the information provided.

Contributions may be submitted from all countries. The usual language of publication is English. All submissions should be submitted electronically to Rena Torres Cacoullos at lvjournal@psu.edu. Please include both a Word and PDF version.

Submission of an article is taken to imply that it has not been previously published or is not being considered for publication elsewhere. If an author is publishing a related article, this fact should be stated.

Copyright. Contributors of accepted articles will be asked to assign their copyrights, on certain conditions, to Cambridge University Press, to help protect their material, particularly in the U.S.A.

Manuscript Preparation and Style

Manuscripts should be under 10,000 words or 40 double-spaced pages, whichever is shorter. The entire manuscript—including abstract, endnotes, references, and tables—must be double-spaced and numbered consecutively. For the initial submission, tables and figures should be included in the running text. The article should be arranged as follows:

Title Page (page 1). The title page includes (a) full title, (b) names and affiliations of all authors, (c) mailing address, phone number, and email address of the lead author, (d) short title of less than 50 characters. All pages following the title page should show the short title plus page number in the upper right corner.

Abstract (page 2). Include the full title and the abstract. Abstracts should not exceed 150 words. List up to 5 keywords.

Acknowledgments (page 2). Place below the abstract. Use this section to indicate any grant support, substantial assistance in the preparation of the article, or any other author notes. Acknowledgements should not exceed 150 words.

Text (page 3). Use a 5-character paragraph indent. Do not hyphenate words or justify the right margin. Glosses should be placed within single quotation marks.

References are to be made in the text (not in the endnotes) by giving in parentheses the name of the author, year of publication, and, where relevant, the page(s) referred to: (Vincent, 1982:90–91).

Contributions within the text should not be linked within the Word Document.

Appendices. Lengthy and technical appendices may optionally appear in the online version only.

Endnotes may be used when more than a simple citation is required. Notes should be numbered consecutively throughout the text and typed on a separate page preceding the reference section.

Tables and Figures. All tables and figures should be identified by a short self-explanatory title, including total number of observations when applicable (n = XXX). All tables and figures must be cited in the text.

All figures should be supplied as electronic files: Please supply diagrams and other line drawings as 1200 dpi TIFF or EPS files. Please supply photographs as 300 dpi (or higher) TIFF files. All figures must be legible in greyscale for the print version.

Reporting Results. For regression analysis, provide the rate or mean value for the dependent variable and the total number of observations when applicable (n = XXX).

Proofs

First proofs will be sent to the lead author, who will be expected to correct and return them to Cambridge, by email, within 48 hours of receipt.
