GEOLOGICAL MAGAZINE

Edited by
O. M. B. BULMAN and S. R. NOCKOLDS
assisted by
PROFESSOR W. S. BOULTON  PROFESSOR O. T. JONES
PROFESSOR W. G. FEARNSIDES  W. J. PUGH
PROFESSOR LEONARD HAWKES  PROFESSOR C. E. TILLEY
HENRY WOODS

CONTENTS

WILSON, A. F. Metamorphism of Granite Rocks by Olivine Dolerite in Central Australia  .......... 73
MABBUTT, J. A. A Study of Granite Relief from South-West Africa  . 87
AMIN, M. S. Metamorphic Differentiation of Talc-Magnesite-Chlorite Rocks in Shetland  .......... 97
BLACK, G. P. The Age Relationship of the Granophyre and Basalt of Orval, Isle of Rhum  .......... 106
ANDERSON, E. M. Lineation and its relation to sub-crustal Convection Currents  .......... 113
LEMON, G. G. The Moinian Inlier of Rosses Point, near Sligo, Eire  .......... 124
BENTOR, Y. K. Magmatic Intrusions and Lava-sheets in the Raman area of the Nagev (Southern Israel)  .... 129
WILSON, G. A Quartz Vein System in the Moine Series near Melness, A'Mhoine, North Sutherland, and its Tectonic Significance  .......... 141
FERMOR, Sir L. L. On a New Chrome Garnet  .......... 145
McKERROW, W. S. Notes on the Species and Subspecies in Palaeontology  .......... 148

CORRESPONDENCE
Zoological Nomenclature, F. HEMMING  .......... 151
Accuracy in Geological Localities, A. MORLEY DAVIES  .......... 152

STEPHEN AUSTIN & SONS, LTD.
1 FORE STREET, HERTFORD, HERTS

SUBSCRIPTION 32/6 PER ANNUM

https://doi.org/10.1017/S001675680006739X Published online by Cambridge University Press
GEOLOGICAL MAGAZINE
founded in 1864
by the late Dr. H. Woodward, F.R.S., with which
is incorporated
THE GEOLOGIST
(founded 1858)

Published every two months, price 32/6 per annum
(single numbers, 7/6).

Subscriptions for 1952, inquiries relating to back stock, advertising, etc., should be sent to Stephen Austin & Sons, Ltd., Fore Street, Hertford, Herts.

Instructions to Contributors.

Articles submitted for publication in the Geological Magazine should be addressed to the Editors at the Sedgwick Museum, Cambridge, not to the Publishers.

Manuscripts should be typewritten, double-spaced, and preferably with a wide margin, and should be carefully revised; they should be as concise as possible, and in no case should an article exceed 10,000 words. MS. must be accompanied by a short abstract, 50–100 words. References should not be given in footnotes, but arranged in alphabetic order of author’s names at the end of the article; the author’s name should be followed by date of publication, and the title of each paper should be given in addition to volume and page numbers of the Journal, thus:

References should be cited in the text by author’s name and date, with page reference if necessary, in brackets:—(Lapworth, 1878, p. 339).

Illustrations should be so drawn as to allow reduction to a maximum size of 6½ × 3½ inches (the type-area of the Magazine) and originals must not exceed 40 × 22 inches. Map lettering should be such as to be clearly legible after reduction (equivalent to 5-point as a minimum on reduction), while lettering on text-figures should in general be left in pencil for printing.

Authors will receive 25 reprints free of cost.

RESEARCH ASSISTANT

UNIVERSITY GRADUATE, female, with majors in chemistry and mineralogy/geology required for base metal research laboratory in Northern Rhodesia. Duties principally microscopic examination of minerals and analytical determinations. Salary according to qualifications and experience, minimum £700 per annum. Fluctuating cost of living allowance now about £8 per month. Life Assurance and Contributory Pension Scheme. Cash Bonus Scheme which at present rate equal to 60% of basic salary. Outward passage paid.—Apply giving full details of age, qualifications, and experience to Foster Turner and Everetts, Limited, Box No. 3123/3, 11 Old Jewry, London, E.C. 2.

HERTFORD

STEPHEN AUSTIN AND SONS, LTD.
CONTENTS OF VOLUME LXXXIX, 1952

No. 1 JANUARY-FEBRUARY PAGE
G. WILSON. Ptygmatic Structures and their Formation 1
K. W. BOND. Cyclic Sedimentation of the Rough Rock (Millstone Grit) as illustrated by a section near Eakring, Nottinghamshire 22
G. A. JOPLIN. The Granitization Process and its Limitations as Exemplified in Certain Parts of New South Wales 25
L. L. FERMOR. A Note on Chromite-Marbles 39
W. T. HARRY. An Unusual Appinitic Sill Near Killin, Perthshire 41
P. QUENSEL. The Paragenesis of the Varutrask Pegmatite 49
E. LEHMANN. The Significance of the Hydrothermal Stage in the Formation of Igneous Rocks 61
CORRESPONDENCE.—The name “Tholeiite”, 69; Age of the Portsalon Conglomerate, 70.
REVIEWS.—Geologia Applicata all’ Ingegneria, 71; International Geological Congress, 71; Das Polarisations-mikroskop, 72; Spectrochemical Analysis, 72.

No. 2 MARCH-APRIL
A. F. WILSON. Metamorphism of Granite Rocks by Olivine Dolerite in Central Australia 73
J. A. MABBUTT. A Study of Granite Relief from South-West Africa 87
M. S. AMIN. Metamorphic Differentiation of Talc-Magnesite-Chlorite Rocks in Shetland 97
G. P. BLACK. The Age Relationship of the Granophyre and Basalt of Oval, Isle of Rhum 106
E. M. ANDERSON. Lineation and its relation to sub-crustal Convection Currents 113
G. G. LEMON. The Moinian Inlier of Rosses Point, near Sligo, Eire 124
Y. K. BENTOR. Magmatic Intrusions and Lava-sheets in the Raman area of the Nagev (Southern Israel) 129
G. WILSON. A Quartz Vein System in the Moine Series near Melness, A’Mhoine, North Sutherland, and its Tectonic Significance 141
Sir L. L. FERMOR. On a New Chrome-Garnet 145
W. S. McKERROW. Notes on the Species and Subspecies in Palaeoentology 148
CORRESPONDENCE.—Zoological Nomenclature, 151; Accuracy in Geological Localities, 152.

No. 3 MAY-JUNE
T. M. THOMAS. Littoral Trias in the Vale of Glamorgan 153
B. W. SPARKS. Pleistocene Sections at Barrington, Cambridgeshire 163
B. E. BALME. Spore Specimens from British Upper Carboniferous Coals 175
F. G. H. BLYTH. Malvern Tectonics—A Contribution 185
W. W. BLACK. Supposed Tufa Bands in Carboniferous Reef Limestones 195
D. PARKINSON. Allometric Growth in Dielasma hastata from Treak Cliff, Derbyshire 201
C. FRIEDLAENDER. Structural Imperfections in Alpine Quartz Crystals 217
C. A. COTTON. Cyclic Resection of Headlands by Marine Erosion 221
