Coagulase-Negative Staphylococcal Infections in Vascular Surgery: Epidemiology and Pathogenesis

Charles E. Edmiston, Jr., PhD; David D. Schmitt, MD;
Gary R. Seabrook, MD

Brief Report: Blood Contamination of Medical Records

Gary P. Wormser, MD; Rosemary Medure-Collins, BSN, RN;
Lynda Mack, BS, RN

Brief Report: Primary and Recurrent Herpes Simplex Infection in a Pediatric Nurse Resulting from a Human Bite

Laurence Fuortes, MD; Enrico Melson, MD

CEU/CME Quarterly Quiz in This Issue

The Official Journal of The Society of Hospital Epidemiologists of America

Now, FOR THE **HIGH RISK** OF **CV** CATHETER RELATED INFECTION, THERE'S THE HIGHER REWARD OF INFECTION CONTROL.

Maintaining the delicate balance of the patient at high risk of infection is the concern of all in critical care medicine. For the immuno-compromised or high-risk patients, infection can be life-threatening. And for everyone involved, infection is very expensive.

Now Becton Dickinson Critical Care Monitoring answers your concerns about catheter related infection with

the first short term CV catheter featuring built-in infection control. Only Safe-Dwel™ catheters from Becton Dickinson come complete with VitaCuff® the antimicrobial collagen cuff clinically proven to dramatically reduce catheter related infections. That means significant care and cost advantages.

The next time the risk of infection is high, choose the higher rewards of effective infection control. Choose Safe-Dwel CV catheters with VitaCuff from Becton Dickinson.

*VitaCuff is a registered trademark of Vitaphore Corp.

As of Volume 1, Number 1, INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY is listed in *Index Medicus*, *Current Contents—Clinical Practice*, *Hospital Literature Index* and *Cumulative Index to Nursing and Allied Health Literature*.

How could we
call ourselves the
Operating Room
Division without
Phxmaseal
Surgical?

The truth is, we couldn't. **Pharmaseal**[®] Surgical's operating room products, anesthesia products and special procedure trays are essential today for assuring an efficient and safe O.R. environment.

To begin with, our **TriFlex**[®] surgical gloves and **Medi-Vac**[®] suction canisters are industry leaders. And **LaserLine** is the first comprehensive group of laser surgery safety products available from a single source.

Pharmaseal Surgical also offers a complete line of single-use procedural trays for anesthesia, patient prepping and diagnostic procedures, as well as **Tru-Cut**[™] and **Jamshidi**[®] biopsy trays.

But perhaps the greatest plus Pharmaseal

offers is its association with two other well-known names in the industry. **V. Mueller**[®] and **Convertors**[®]/**Custom Sterile**. Together as the Operating Room Division, we're uniquely qualified to help you with both the clinical and business issues you face. The result will make your O.R. as efficient and productive as possible, while still maintaining the highest standards of patient care possible.

The bottom line? Your operation wouldn't be the same without Pharmaseal Surgical. And neither would ours.

For more information, write **Baxter Healthcare Corporation**, Operating Room Division, 1500 Waukegan Road, **McGaw Park**, IL 60085.
