Featured in this issue

PERSPECTIVES
Corabian et al.: Adaptive evolution of rapid assessments
Oortwijn and Klein: Health system values and HTA

METHODS
Jen et al.: Noncompliance for confirmation after screening
Toledo-Chavarría et al.: Patient involvement in Spanish HTA
Srich et al.: Addressing sociocultural aspects in HTA
Vogler and Schneider: Assessment of medicine price data sources

ASSESSMENTS
Abel et al.: Cost-effectiveness of COPD testing
Pruis et al.: Cost-effectiveness of sunitinib for advanced RCC
Angela et al.: What is the efficacy of specialised early intervention
Meads et al.: Cost-effectiveness of pain management
Brew-Sam and Chib: Diabetes Self-Management Apps for Empowerment
Gallacher et al.: A review of survival extrapolations in NICE STAs
The Journal welcomes submissions of articles that evaluate health technology topics to support health policy or practice decisions, or discuss methods of assessing such technologies; please see Journal Aims and Scope for details. Manuscripts are curated by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 10 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, capitalization, and punctuation should conform to the 15th Edition of The Chicago Manual of Style (University of Chicago Press).

MANUSCRIPT SUBMISSION AND REVIEW. All manuscript submissions to the International Journal of Technology Assessment in Health Care must be made electronically via ScholarOne Manuscripts, at the website: http://mc.manuscriptcentral.com/ijtahc

Please follow the detailed instructions on the website to avoid delays. The authors are asked to provide contact information and they may suggest reviewers. The website automatically acknowledges receipt of the manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must quote manuscript reference number and should be sent by email to the Editorial Office at IJTAHC@thl.fi.

PREPARATION OF MANUSCRIPTS. The manuscript, including all references, must be provided in Word or RTF format, double-spaced on 8½ x 11 inch or A4 page sizes, with at least 1-inch (2.54 cm) margins. Manuscripts should typically have less than 4000 words, including the abstract of 250 words maximum, and usually no more than 25 references. Manuscripts should be as follows: 1) cover sheet; 2) title page; 3) abstract and keywords; 4) acknowledgments, including source of funding; 5) text; 6) references; 7) tables with titles; and 8) figures, with captions on a separate page.

The Journal accepts no more than four tables or figures altogether for a single manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must quote manuscript reference number and should be sent by email to the Editorial Office at IJTAHC@thl.fi.

IN-TEXT CITATIONS. Bibliographic citations in the text should be indicated by Arabic numerals in parentheses. When authors are mentioned in the text, the reference number(s) should be enclosed in parentheses after the mention of the name(s) and without punctuation in the text. Table footnotes appear directly after the table; table references number separately from the tables and figures in the published issue.

The Journal accepts no more than four tables or figures altogether for a single manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must quote manuscript reference number and should be sent by email to the Editorial Office at IJTAHC@thl.fi.

REFERENCES AND NOTES. The references must be arranged according to the ICMJE Uniform Requirements for Manuscripts (URM): numbered consecutively in the text. Each reference should be cited in the text. Table footnotes should be cited at the foot of the table. Each reference should be numbered separately from the tables and figures in the published issue.

The Journal accepts no more than four tables or figures altogether for a single manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must quote manuscript reference number and should be sent by email to the Editorial Office at IJTAHC@thl.fi.

COPYRIGHTING AND PROOFREADING. The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the lead author for final review.
CONTENTS

Perspectives

77  Adaptive evolution in rapid assessments: A 25-year perspective  
Paula Corabian, Bing Guo, Carmen Moga and N. Ann Scott

82  Addressing health system values in health technology assessment: The use of evidence-informed deliberative processes  
Wija Oortwijn and Philip Klein

Methods

85  Hurdle Poisson regression model for identifying factors related to noncompliance and waiting time for confirmatory diagnosis in colorectal cancer screening  
Hsiao-Hsuan Jen, Tsung-Hsi Wang, Han-Mo Chiu, Szu-Min Peng, Chen-Yang Hsu, Sherry Yueh-Hsia Chiu, Sam Li-Sheng Chen, Amy Ming-Fang Yen, Yi-Chia Lee, Hsiu-Hsi Chen and Jean Ching-Yuan Fann

92  Toward a strategy to involve patients in health technology assessment in Spain  
Ana Toledo-Chávarri, Yolanda Alvarez-Perez, Yolanda Triñanes, Lilisbeth Perestelo-Pérez, Mireia Espallargues, Matilde Palma and Pedro Serrano-Aguilar

99  Methods assessing sociocultural aspects of health technologies: Results of a literature review  
Anne Kathrin Stich, Kati Mozygemba, Kristin Bakke Lysdahl, Lisa Maria Pfadenhauer, Bjorn Hofmann, Gert-Jan van der Wilt and Ansgar Gerhardus

106  Assessing data sources for medicine price studies  
Sabine Vogler and Peter Schneider

Assessments

116  Is stratification testing for treatment of chronic obstructive pulmonary disease exacerbations cost-effective in primary care? An early cost-utility analysis  
Lucy Abel, Helen A. Dakin, Nia Roberts, Helen F. Ashdown, Chris C. Butler, Gail Hayward, Ann Van den Bruel, Philip J. Turner and Yaling Yang

126  Cost-effectiveness analysis of sunitinib versus interferon-alfa for first-line treatment of advanced and/or metastatic renal cell carcinoma in Singapore  
Sil-ling Pruis, Mohamed Ismail Abdul Aziz, Fiona Pearce, Min Han Tan, David Bin-Chia Wu and Kwong Ng

134  “What is the efficacy of specialised early intervention in mental health targeting simultaneously adolescents and young adults?” An HTA  
Angela Ly, Gilbert A. Tremblay and Sylvie Beauchamp

141  Cost-effectiveness of pain management strategies in advanced cancer  
David M. Meads, John L. O’Dwyer, Claire T. Hulme, Rocio Rodriguez Lopez and Michael I. Bennett

150  How do smart device apps for diabetes self-management correspond with theoretical indicators of empowerment? An analysis of app features  
Nicola Brew-Sam and Arul Chib

160  How do pharmaceutical companies model survival of cancer patients? A review of nice single technology appraisals in 2017  
Daniel Gallacher, Peter Auguste and Martin Connock
