The Journal of Laryngology and Otology
(Founded in 1887 by Morell Mackenzie and Norris Wolfenden)
EDITED BY
WALTER HOWARTH
ASSISTED BY
V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.
4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the Journal of Laryngology. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications should be addressed to "EDITOR, Journal of Laryngology, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."
7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.
8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.
9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

UNITED STATES OF AMERICA
Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & Co., 31-33 East 10th Street, New York.

DEAFNESS!
The Choice of Medical Men

for their own deafness or to recommend to patients is the "Ardente" method, because it is so entirely different, uncopyable, and carries a written lifelong guarantee and service by its originator—Mr R. H. Dent—not any mere selling agent or company.

It is the most complete method—the commonsense way and the only individual method. Made in a wide range of types—one is suited to the individual needs of the patient, and only when tested and found suitable is the right type completed and supplied. Interest is taken and adjustments made in accordance with any changed condition of hearing of the user.

"Ardente" is the Choice of
Prof. SIR AMBROSE FLEMING, Kt., M.A., B.Sc, F.R.S., and many leading medical men—professional etiquette makes it necessary for us to withhold their names. "ARDENTE" is shown and appreciated at every B.M.A. meeting, and every improvement is made in direct collaboration after test and consultation with eminent medical men and scientists. No distinguished name used is that of a staff-member—all are of deaf people themselves lending their names and experience for the benefit of fellow-sufferers without personal gain or profit.

All are men of knowledge and world-wide experience, able to judge and have the BEST.

"Ardente" is the choice of every important medical journal and "TRUTH," and for use at Hospitals and supplied through charities, Government Departments (also used by government officials). Behind "ARDENTE" is a personality—his interest is yours, his success built by the recommendation of his users who chose "Ardente" on its merits—

"Ardente" can be tested Free at any of our Service Bureaux—the most complete in the whole deaf world—or at Doctors' surgeries or patients' homes any day, any time—weekends and evenings if preferred. Please send for particulars—we will be happy to arrange a free demonstration to you if Deaf yourself or interested on behalf of patients.

"ARDENTE" STETHOSCOPE
Mr B. H. Dent makes a Stethoscope specially for members of the medical profession suffering from deafness. Many are in use, and excellent results are reported on the latest, as evidenced by the interest shown at the last B.M.A. Meeting.

Mr Dent is the inventor of "Ardente."
Mr Dent is the pioneer of individual ear-fitting.
Mr Dent is the originator of the "Free Home Test."

CHEVALIER JACKSON’S INSTRUMENTS FOR OESOPHAGOSCOPY, LARYNGOSCOPY, AND BRONCHOSCOPY

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson’s most recent models, and each is supplied with a spare light carrier, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are black.

The Howarth-Jackson’s Instruments are less expensive than other American or English models, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2-5 volt and more durable than the usual models.

Manufactured only by

DOWN BROS., LTD.

DeVILBISS CO., LTD., WEST DRAYTON, MIDDLESEX
Every Pain is due to a disturbance of the physical or mental equilibrium, an interruption of some vital function, and a deviation from the normal. Injuries, inflammations, excessive muscular strain, disturbances of the circulation, all are productive of pain. And be it trivial or severe, uppermost in the mind of the patient is the prompt suppression of that pain.

To the patient wracked by the painful pneumonic process, nothing is more comforting than an Antiphlogistine jacket applied over the thoracic walls. Physicians conversant with this simple procedure generally concede that this plastic anodyne dressing increases the superficial circulation by the induction of artificial hyperaemia setting up a highly decongesting process in the deeper seated tissues and thereby relieving the dyspnoea and the stress on the right heart.

Antiphlogistine is an invaluable auxiliary in the management of the pneumonias or wherever pain is a prominent factor.

Mr BEARDS

The Hospital has recently undergone very extensive reconstruction and extension, and
now has 101 beds for In-patients and an annual Out-patient attendance of about 60,000.

CLINICAL INSTRUCTION
Clinical Instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and
Throat is daily given in the Out-patient Department from 2 to 5 p.m. On Tuesdays and
Fridays from 6.30 to 8 p.m. also. Major operations are performed daily, except Saturdays,
in the In-patient Operating Theatres. Minor operations are performed in the Out-patient
Department by the Assistant Surgeons on three mornings a week.

Practitioners and Medical Students are admitted to the practice of the Hospital, and Clinical
Assistant, whose duty it is to assist the staff, are appointed from time to time among
them. For further information apply to the Dean, Mr F. CUNLIFFE ORMEROD.

## AIDS FOR THE DEAF

HAWKSLY'S AURICLES
The best non-electric aid for slight and moderate degrees of deafness.

For Extreme Cases of Deafness
HAWKSLY'S "GREEN STRIPE" CONVERSATION TUBES

**IMPORTANT NOTICE**

We are the originators of an independent 10 days' free home trial, without obligation to purchase, of any of our Acoustic Aids. We daily hear most distressing tales from deaf people who have been coerced into purchasing expensive aids without a proper home trial.

We also stock all patterns of Electric Ear Phones.

**ESTABLISHED 1869**
