VERY HIGH ANGULAR RESOLUTION IMAGING
VERY HIGH ANGULAR
RESOLUTION IMAGING

PROCEEDINGS OF THE 158TH SYMPOSIUM OF THE
INTERNATIONAL ASTRONOMICAL UNION,
HELD AT THE WOMEN'S COLLEGE, UNIVERSITY OF SYDNEY,
AUSTRALIA, 11–15 JANUARY 1993

EDITED BY
J.G. ROBERTSON
and
W.J. TANGO
School of Physics, University of Sydney,
New South Wales, Australia

KLUWER ACADEMIC PUBLISHERS
DORDRECHT / BOSTON / LONDON
# TABLE OF CONTENTS

Preface xi  
Symposium Organizers and Sponsors xii  
List of Participants xiii  

## Radio/Optical comparisons

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>C R Masson</td>
<td>Seeing [invited]</td>
<td>1</td>
</tr>
<tr>
<td>R Nityananda</td>
<td>Comparing optical and radio — quantum issues [invited]</td>
<td>11</td>
</tr>
</tbody>
</table>

## Transfer of Techniques

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>C H Townes <em>et al.</em></td>
<td>Heterodyne interferometry in the infrared [invited]</td>
<td>19</td>
</tr>
<tr>
<td>J M Moran</td>
<td>The SAO submillimeter wavelength array [invited]</td>
<td>27</td>
</tr>
<tr>
<td>T J Cornwell</td>
<td>Imaging techniques: Limitations to the quality of images [invited]</td>
<td>37</td>
</tr>
<tr>
<td>C H Townes</td>
<td>Surprise and sociology in multi-disciplinary sciences [public lecture]</td>
<td>47</td>
</tr>
</tbody>
</table>

## Imaging Techniques

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>R J Hanisch &amp;</td>
<td>HST image restoration: current capabilities and future prospects [invited]</td>
<td>61</td>
</tr>
<tr>
<td>R L White</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A Richichi</td>
<td>Lunar occultations: from past to future achievements [invited]</td>
<td>71</td>
</tr>
<tr>
<td>M Tallon &amp;</td>
<td>Beam combination for wide field imaging [invited]</td>
<td>83</td>
</tr>
<tr>
<td>I Tallon-Bosc</td>
<td></td>
<td></td>
</tr>
<tr>
<td>D F Buscher</td>
<td>Direct maximum-entropy image reconstruction from the bispectrum</td>
<td>91</td>
</tr>
<tr>
<td>A A Deshpande</td>
<td>Source-noise in radio synthesis images of polarized sources</td>
<td>95</td>
</tr>
<tr>
<td>M A Holdaway</td>
<td>Phase calibration of the proposed millimeter array</td>
<td>101</td>
</tr>
<tr>
<td>A J Beasley <em>et al.</em></td>
<td>VLBA phase-referencing</td>
<td>105</td>
</tr>
</tbody>
</table>

## Radio Array Instruments

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>R A Perley</td>
<td>Radio arrays - mm to meters [invited]</td>
<td>109</td>
</tr>
<tr>
<td>P J Napier</td>
<td>The Very Long Baseline Array [invited]</td>
<td>117</td>
</tr>
</tbody>
</table>
Recent results from the VLBA
MERLIN — A phase-stable ‘VLBI’ array
The Southern Hemisphere VLBI Experiment program, SHEVE

Optical and Infrared Interferometers and Arrays

The Sydney University Stellar Interferometer (SUSI) [invited]
The VLT Interferometer [invited]
The Big Optical Array [invited]
Progress on GI2T
The COAST interferometer
An adaptive steerable imaging array
CIROI project

Instrumentation and Techniques

The baseline metrology system of the USNO astrometric interferometer
Design and construction of a beam combiner and related hardware
An overview of the SUSI control system
The fringe tracking servo in SUSI
Motion of the delay lines of an optical interferometer when reconstructing an image by redundant spacing calibration
The micro-precision interferometer testbed instrument design
Phase and image reconstruction from pupil-plane observations in the near infrared: integration of the phasors
Radio source variability as a tool for very high resolution

Imaging Theory

Iterative blind deconvolution method with use of Lucy’s algorithm: application to IR speckle data
Speckle imaging with the bispectrum and without reference star
CLEAN/MEM deconvolution errors: semicompact sources 212

D S Briggs & T J Cornwell

Generalized versus classical maximum entropy for imaging 215

A T Bajkova

Super-resolution by phase-gradient unravelling 218

D Fraser & B R Hunt

Restoration over fields of view wider than the isoplanatic patch 221

G Thorpe & D Fraser

Differential diffraction in Michelson stellar interferometry 224

M Hrynevych

Impact of Technology I: Radio and Millimeter Waves

Optical fibres in radioastronomy [invited] 227

A C Young

Recent developments in mm and sub-mm interferometry [invited] 235

M Ishiguro

High resolution radio source maps at 73.8 MHz 243

R A Perley et al.

AIPS++: A new astronomical imaging package [invited] 247

R P Norris

Impact of Technology II: Optical and Infrared

Latest technical developments at the infrared spatial interferometer 257

M Bester et al.

Integrated optics in astronomical interferometry [invited] 261

V Coudé du Foresto

Adaptive Optics and Seeing

Adaptive optics: performance and limitations [invited] 273

F Roddier

Laser guide star adaptive optics: present and future [invited] 283

S S Olivier & C E Max

Laser guide star adaptive optics on the 1.5 m telescope at the Starfire Optical Range 293

R Q Fugate

Minimum redundant aperture masking interferometry with tip-tilt wavefront correction 296

J Nishikawa et al.

Observations of seeing at 0.5 and 12.4 μm 299

W Livingston et al.

Preliminary seeing measurements for SUSI 302

T A ten Brummelaar et al.

Aspects of the theoretical performance of modal adaptive optics 305

R W Wilson & C R Jenkins

Simulation study of a low-light-level wavefront sensor driving a low-order, near-IR adaptive optics system 308

D W Tyler & G C Loos
Aperture Distributions

M Shao
C A Haniff
T R Bedding et al.
R G Marson
V Migenes et al.

Fringe visibility and phase measurements [invited] 311
Speckle vs non-redundant masking [invited] 317
MAPPIT: optical interferometry with non-redundant masks 327
Optimal linear arrays for wide bandwidths 331
High resolution and high sensitivity spectral-line imaging with multiple arrays 334

Imaging Results: Radio and Millimeter Waves

R C Jennison
B Anderson & R D Davies
P Qiu et al.
W C Erickson et al.
X Zhang & Y Zheng
D A Forbes et al.
R Beck et al.
A Kukushkin
B Stecklum et al.
P N Wilkinson et al.

High resolution imaging forty years ago 337
Results with the extended MERLIN 343
High resolution image reconstruction at Yunnan Observatory 346
High resolution imaging at mm-wavelengths with the Hat Creek Array 349
Miyun 232 MHz survey and some new imaging techniques 352
Compact array mapping of the nuclear starburst in NGC 7552 355
ATCA radio polarization observations of NGC 1566 and NGC 1672 358
Fluctuations of polarized radiation in a random magnetoplasma 361
High angular resolution observations of Her 36 364
The Caltech-Jodrell Bank (CJ) VLBI snapshot surveys 367

Imaging Results: Optical and Infrared

S R Restaino et al.
T Reinheimer et al.
T Chandrasekhar et al.
A Eckart et al.
W C Danchi et al.

First experimental results from pupil masking on a solar telescope 370
Optical interferometry in the multi-speckle mode 373
Near infrared high angular resolution observations of stars and circumstellar regions by the technique of lunar occultations 376
Diffraction-limited near infrared imaging of the central parsec of the Galaxy 379
Long baseline interferometric observations of circumstellar dust shells at 11 microns 383
