animal publishes original cutting-edge research, ‘hot’
topics and horizon-scanning reviews on animal-related
aspects of the life sciences at the molecular, cellular,
organ, whole animal and production system levels.

The main subject areas include: breeding and genetics;
nutrition; physiology and functional biology of systems;
behaviour, health and welfare; farming systems,
environmental impact and climate change; product
quality, human health and well-being.

Journal of Dairy Research

CONTENTS

• Editorial: The Journal of Dairy Research
  Ch Knight

ORIGINAL ARTICLES

• Genetically engineering milk
  CBA Whitelaw, A Joshi, S Kumar, SG Lillico and
  C Proudfoot

• Minor milk constituents are affected by protein
  concentration and forage digestibility in the feed
  ration
  T Larsen, L Alstrup and MR Weisbjerg

• Effects of α-linolenic acid-enriched diets on
  gene expression of key inflammatory mediators in
  immune and milk cells obtained from Holstein dairy
  cows
  P Razamand, BP Hatch, KG Carnahan and
  MA McGuire

• Effect of ruminally unprotected Echium oil on milk
  yield, composition and fatty acid profile in
  mid-lactation goats
  M Renna, C Lussiana, P Cornale, LM Battagini,
  R Formina and A Mimosi

• Effect of feeding ensiled mixture of pomegranate
  pulp and drier feeds on digestibility and milk
  performance in dairy cows
  Y Shaani, D Elizur, N Mizrachi, Y Yosef, B Men-
  Ben, M Nekoshat, R Sitsonon, Sj Mabjeesh and J Miro

• Fatty acid profiles of milk and Minas frescal/
  cheese from lactating grazed cows supplemented
  with peanut cake
  WGS Gordt, J Viegas, AM Barbosa, RL Oliveira, CA Dias,
  ES Costa, JL Nornberg, GGP de Carvalho, LR Bezerra
  and AM Silveira

• Fatty acid profiles of milk and Minas frescal/
  cheese from lactating grazed cows supplemented
  with peanut cake – ERPATUM
  WGS Gordt, J Viegas, AM Barbosa, RL Oliveira, CA Dias,
  ES Costa, JL Nornberg, GGP de Carvalho, LR Bezerra
  and AM Silveira

• High levels of acetocetate and glucose increase
  expression of cytokines in bovine hepatocytes,
  through activation of the NF-κB signaling
  pathway
  Y Li, L Ding, X Wang, L Liu, D Huang, R Zhang,
  L Guo, Z Wang, X Li, S Liu, J Wu and X Li

• Covariance structures of fat and protein influence
  the estimation of IgG in bovine colostrum
  MM Løkke, R Engelschot and L Wiking

• 25-hydroxyvitamin D circulates in different fractions
  of calf plasma if the parent compound is vitamin D3
  or vitamin D2, respectively
  L Hymøller and SK Jensen

• Evidence of no protection for a recurrent case of
  pathogen specific clinical mastitis from a previous
  case
  E Cha, J Herf, Y Schukken, L Tauer, F Welcome
  and Y Golrih

• Production and chemical composition of two
  dehydrated fermented dairy products based on
  cow or goat milk
  J Moreno-Fernández, J Diaz-Castro, MRM Albeira,
  S Hirsch, T Nastares and J López-Alaga

• Comparative study of microbiological, chemical and
  sensory properties of kefirs produced in
  Estonia, Latvia and Lithuania
  D Kazus, P Toomik, K Meremäe, S Kuusk, P Tormek,
  P Lepiku, K Laikoja, T Kaaret, M Lepiku and T Fossas

• Whey cheese: membrane technology to increase
  yields
  F Reira, P González and C Muro

• Potential use of scotta, the by-product of the
  ricotta cheese manufacturing process, for the
  production of fermented drinks
  P Maragkoudakis, V Vendramin, B Bovo, L Tesei,
  V Cocco and A Gallonino

• Modulating the textural characteristics of whey
  protein nanofibrils with different
  concentrations of calcium chloride
  T Fajari, A Madadlou and M Labbafi

• Screening for antimicrobial and proteolytic
  activities of lactic acid bacteria isolated from cow,
  buffalo and goat milk and cheeses marketed in
  the southeast region of Brazil
  FL Tulini, N Hymery, T Haertlé, G Le Blay and
  ECP De Martinis

• Optimised production and spray drying of
  ACE-inhibitory enzyme-modified cheese
  F Amighi, Z Emam-Djomeh and A Madadlou

• Optimised production and spray drying of
  ACE-inhibitory enzyme-modified cheese
  F Amighi, Z Emam-Djomeh and A Madadlou
