CONTENTS

Uniformity of fuel target implosion in heavy ion fusion 591

Characteristics of target polarization by laser ablation 601

Fusion energy using avalanche increased boron reactions for block-ignition by ultrahigh power picosecond laser pulses 607

Beat wave excitation of electron plasma wave by coaxial code-Gaussian laser beams in collisional plasma 621

Radiation of high-power ultrawideband pulses with elliptical polarization by four-element array of cylindrical helical antennas 633

Stimulated coherent scattering of surface plasma wave excited over metallic surface by a laser 641

A relativistic PIC model of nonlinear laser absorption in a finite-size plasma with arbitrary mass and density ratios 647

Ionization asymmetry effects on the direct drive targets compression for the megajoule laser facility 655

Weibull-type stochastic distributions as a result of saturation in stimulated scattering processes 667

Well-defined atomic hydrogen target driven by electromagnetic shock wave for stopping power measurement 679

K-in emission and secondary electrons in femtosecond laser target interactions 685

Scaling of ion energies in the relativistic induced transparency regime 695

Collisional effects on the modulational instability of intense laser pulses in magnetized plasmas 705

Generation of terahertz radiation by beating of two circular flat-topped laser beams in collisional plasma 713

Self-similar two-electron temperatures plasma expansion into vacuum 723

Weibull-type stochastic distributions as a result of saturation in stimulated scattering processes 739

Well-defined atomic hydrogen target driven by electromagnetic shock wave for stopping power measurement 751

K-in emission and secondary electrons in femtosecond laser target interactions 755

Scaling of ion energies in the relativistic induced transparency regime 765

Collisional effects on the modulational instability of intense laser pulses in magnetized plasmas 773
Laser and Particle Beams
Pulse Power, High Energy Densities, Hot Dense Matter, and Warm Dense Matter

Laser and Particle Beams is an international journal that covers the generation, and the interaction with matter, of high intensity laser and particle beams. It also covers the physics of systems with high energy densities. Specific fields of interest include magnetic fusion, especially inertial confinement, magnetic confinement, diagnostics, material treatments, laboratory astrophysics, plasmas, and spectroscopy at extreme conditions, physical properties of hot dense matter, warm dense matter, and intense particle beams and optical (laser) beams from the microwave to the X-ray region. The exploration of these fields and their new physics, including nonlinear and nonclassical phenomena, should find a forum in this journal.

As well as publishing original articles, the journal also publishes occasional review articles, surveys of research at particular laboratories, and reviews of recent books.

Laser and Particle Beams is indexed in Chemical Abstracts, Computerized Engineering Index, Current Contents, Engineering Index (Multilingual), Inspec, Mechanical Engineering Abstracts, Referativnyi Zhurnal, Science Citation Index, SCOPUS, Index of Scientific Reviews.

Organizations in the USA who are also registered with C.C.C. may therefore copy material beyond the limits permitted by sections 107 and 108 of US copyright law subject to payment to C.C.C. of the per copy fees of US $2.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0263-0346/15 $20.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorized to supply single copies of separate articles for private use only.

Subscriptions: Laser and Particle Beams (ISSN 0263-0346) is published in March, June, September, and December by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473/Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. 2015 Annual rates for institutions electronic: US $1570.00 in the USA, Canada, and Mexico. $1700.00 + VAT elsewhere. Individuals electronic: US $258.00 in the USA, Canada, and Mexico; £228.00 + VAT elsewhere.

Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent, or direct to the publishers: Cambridge University Press, Journals Department, 32 Avenue of the Americas, New York, NY 10013-2473, USA; orders outside the US, Canada, or Mexico may be sent to Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, England. Claims for missing issues should be made immediately after receipt of the next issue.
