1 Dropping slender-body theory into the mud
S. E. Spagnolie

5 A rarefied gas flow around a rotating sphere: diverging profiles of gradients of macroscopic quantities
S. Taguchi, K. Saito & S. Takata

34 Hydrodynamics of periodic wave energy converter arrays
G. Tikšik & D. K. P. Yue

75 Drag reduction in turbulent flows along a cylinder by streamwise-travelling waves of circumferential wall velocity
M.-X. Zhao, W.-X. Huang & C.-X. Xu

99 Laboratory experiments on the temporal decay of homogeneous anisotropic turbulence
L. R. Esteban, J. S. Shrimpton & B. Ganapathisubramani

128 The role of gravity in the prediction of the circular hydraulic jump radius for high-viscosity liquids
Y. Wang & R. E. Khayat

162 A simple system for moist convection: the Rainy–Bénard model
G. K. Vallis, D. J. Parker & S. M. Tobias

200 System identification of a low-density jet via its noise-induced dynamics
M. Lee, Y. Zhu, L. K. B. Li & V. Gupta

216 Separated rows structure of vortex streets behind triangular objects
I. Kim

227 Large eddy simulation of transient upstream/downstream vortex interactions
K. J. Forster, S. Diasinos, G. Doig & T. J. Barber

261 Droplet levitation over a moving wall with a steady air film
E. Sawaguchi, A. Matsuda, K. Hama, M. Saito & Y. Tagawa

283 Macroscopic model for unsteady flow in porous media
D. Lasseux, F. J. Valdés-Parada & F. Bellet

312 Thermophoresis of a spherical particle: modelling through moment-based, macroscopic transport equations
J. C. Padrón, J. E. Sprittles & D. A. Lockerby

348 Dynamics of heavy and buoyant underwater pendulums

364 On the breakup of spiralling liquid jets
Y. Li, G. M. Sisoev & Y. D. Shikhmurzaev

385 Shape and rheology of droplets with viscous surface moduli
V. Narasimhan

412 nozzle external geometry as a boundary condition for the azimuthal mode selection in an impinging underexpanded jet

449 A Lagrangian probability-density-function model for collisional turbulent fluid-particle flows
A. Innocenti, R. O. Fox, M. V. Salvetti & S. Chibbaro

490 Incipient bedforms in a bidirectional wind regime
C. Gadal, C. Narteau, S. Courrech du Pont, O. Rouzi & P. Claudin

517 Analytical solutions for mass transport in hydrodynamic focusing by considering different diffusivities for sample and sheath flows
A. Sadeghi

552 A new model of shedding and breaking waves: one-dimensional solitary wave on a mild sloping beach
M. Kazakova & G. L. Richard

592 Collision and breakup of fractal particle agglomerates in a shear flow
F. F. Dirazaj, J. S. Marshall & J. R. Grant

Contents continued on inside back cover.
The picture on the cover is based on figure 1(e) of ‘Incipient bedforms in a bidirectional wind regime’, by C. Gadai, C. Narteau, S. Courrech du Pont, O. Rozier & P. Claudin.

S indicates supplementary data or movies available online.
The Journal of Fluid Mechanics exists for the publication of theoretical, computational and experimental investigations of all aspects of the mechanics of fluids.

EDITOR
Prof. M. G. Worster, University of Cambridge, mgw.jfm@damtp.cam.ac.uk

DEPUTY EDITORS
Prof. P. F. Linden, University of Cambridge, p.f.linden@damtp.cam.ac.uk
Prof. C. Meneveau, Johns Hopkins University, meneveau@jhu.edu

BOOK REVIEW AND FOCUS ON FLUIDS EDITOR
Prof. A. Juel, University of Manchester, anne.juel@manchester.ac.uk

EDITORIAL OFFICE
FAX 44 1223 325802; JFMproduction@cambridge.org
SUMMARY OF INSTRUCTIONS FOR AUTHORS

Full instructions are available on the JFM web page at cambridge.org/flm

Submission

Authors wishing to have papers published in the Journal should submit them via the online submission and refereeing system, ScholarOne Manuscripts, at https://mc.manuscriptcentral.com/jfm. Papers may be submitted to any editor or associate editor but JFM Rapids articles (10 printed pages or fewer) must be submitted to Professors Guazzelli, Caulfield, Dabiri, Henningson or Lohse who should be consulted in advance. Submission of a paper implies a declaration by the author that the work is not being considered for publication elsewhere and that it has not already been considered by a different editor of the Journal. Conference Reports must be submitted within three months of the meeting.

Preparation of papers

Authors are encouraged to write their papers clearly, concisely and attractively, so that their work will be readily understood. A brief summary of editorial requirements for notation, English and presentation is available on the JFM web page (address above). Authors are urged to use the JFM latex style macros. The [referee] option should be used for initial submission. The style file and template files are available at cambridge.org/core/journals/journal-of-fluid-mechanics/information/instructions-contributors. While use of the JFM latex style file is preferred (and note that this is mandatory for JFM Rapids submissions), ordinary latex or plain tex files can also be accepted. Other software, such as Word, will be converted to latex by the Press or retyped. Manuscripts not prepared using the JFM latex style file should be typed in double spacing, with references listed at the end in alphabetical order of authors and with a separate list of figure captions.

Extensive detailed mathematical relations, tables or figures likely to be useful only to a few specialists will not be printed, but will be available as an electronic supplement to the online version or from the JFM Editorial Office.

Movies

Refereed movies that are integral to a paper can be supplied during the submission process and will be published as supplementary materials.

Accepted papers

Once a paper is accepted, final production files (e.g. the LaTeX source) must be uploaded to the ScholarOne Manuscripts site. Full details are given on the JFM web page. Do not email files to the JFM Editorial Office unless requested to do so.

Charges

There is no charge for publication, but the cost of any colour figures in standard articles must be borne by authors. Authors will receive a PDF file of their published article via email. For standard articles only, offprints can be purchased if ordered when the proofs are returned.

Address questions or comments to Mrs Amanda Johns (Editorial Assistant) or Mrs Alison James (Production Editor) at the Journals Department, Cambridge University Press, Shaftesbury Road, Cambridge CB2 8BS, UK; tel: 44 (0)1223 347922; fax: 44 (0)1223 325802; e-mail: JFMproduction@cambridge.org.
