

PUBLICATIONS OF THE ASTRONOMICAL SOCIETY OF JAPAN

A quarterly journal of astronomy and astrophysics founded in 1949

Managing Editor: W. UNNO, University of Tokyo

Board of Editors: C. Hayashi, Z. Hitotuyanagi, Y. Kozai, S. Miyamoto,
T. Okuda, K. Osawa, T. Shimizu, Z. Suemoto, H. Tanaka

Associate Editors: E. HIEI, G. HORI, J. JUGAKU, Y. UCHIDA

Subscription price is US \$26.– per volume of four issues. Back numbers are also available at US \$20.– per volume and US \$5.– for single copies (Vol. 1–Vol. 20), and at US \$28.– per volume and US \$7.– for single copies (Vol. 21 and thereafter).

Subscriptions and orders for back numbers should be addressed to:

MARUZEN CO. Ltd.
(Export Department), Nihonbashi, Tokyo, Japan

BULLETIN

of the ASTRONOMICAL INSTITUTES OF CZECHOSLOVAKIA

EDITOR: B. ŠTERNBERK

Contents of Vol. 22, No. 3, June 1971

L. Perek / Photometry of southern planetary nebulae. – S. Kříž / Mass transfer in close binaries. II. Trajectories of particles and formation of gaseous rings. – V. Vanýsek / On the Lyman- α radiation in regions distant from the cometary nucleus. – M. E. Machado / Thermal, turbulent and macroscopic motions in the loop prominence of May 4, 1960. – M. Rybanský / New method of photometry of coronal lines 5303 Å and 6374 Å at Lomnický štít. – P. Navara, T. Daříček, K. Hamal, A. Novorný / Laser ranging equipment on Ondřejov Observatory. – V. Matas / Periodic solutions of the generalized Huang's model of the restricted four-body problem. – Z. Urbánek / L'évolutions des perturbations locales au modèle nonstatistique de l'univers du point de vue de la cosmologie newtonienne. –

Bull. astr. Inst. Csl. is published by the Publishing House of the Czechoslovak Academy of Sciences.
Address of the Editor: Astronomical Institute of the Czechoslovak Academy of Sciences, Budečská 6, Praha 2.

6 issues a year

Subscription price Lst. 7.00.0

ACADEMIC PRESS Inc. (London) Limited

SOLAR PHYSICS

A Journal for Solar Research and the Study of Solar Terrestrial Physics

Editors: C. DE JAGER (Utrecht) – Z. ŠVESTKA (Prague)

Contents of Volume 20, No. 2, November 1971:

J. E. Brolley / Primary Solar Reaction Dependence on Deuteron Structure. – R. J. Reif and S. Musman / Interference in Solar Oscillations. – E. Gurtovenko and V. Troyan / The Use of the Goldberg-Unno Method for the Investigation of Small-Scale Photosphere Motions. – R. C. Canfield / A Measurement of the Non-Thermal Velocity in the Low Chromosphere. – S. Y. Liu and N. R. Sheeley, Jr. / A Comparison of the Intensity Variations of the Photospheric and K Line Chromospheric Network with Time. – S. B. Pikel'ner / Nature of the Fine Structure of the Middle Chromosphere. – P. Foukal / $H\alpha$ Fine Structure and the Chromospheric Field. – S. W. Prata / A Note on Chromospheric Fine Structure at Active Region Polarity Boundaries. – A. M. Flett, P. R. Foster, P. Strachan, and D. C. Thornton / Observations of a Partial Solar Eclipse at 9 mm Wavelength. – M. Landini and B. C. Monsignorini Fossi / A Simple Formula for the Total Dielectronic Recombination Coefficient. – M. Waldmeier / The Asymmetry of Solar Activity in the Years 1959–1969. – C. G. Lilliequist, M. D. Altschuler, and Y. Nakagawa / The Dynamics of a Toroidal Magnetic Ring. – A. Wittmann / On Magneto-Optical Effects in Sunspots. – O. Engvold and W. Livingston / High Dispersion Spectroscopic Study of Quiescent Prominences. – R. Fisher and T. Pope / Coronagraphic Observations of an Enhanced Coronal Region: I. Fe XV and Ni XIII Emission Line Data. – R. W. Milkey, N. K. Blocker, W. H. Chambers, P. E. Fehlau, J. C. Fuller, and W. E. Kunz / The Time Behavior of Temperature and Emission Measure in X-Ray Flares. – G. Elwert and E. Haug / Anisotropy of Solar Hard X-Radiation During Flares. – S. W. Kahler, G. A. Doschek, J. F. Meekins, and D. M. Horan / Discussion of Paper 'On the Polarization and Anisotropy of Solar X-Radiation During Flares', by G. Elwert and E. Haug. – R. P. Kirshner and R. W. Noyes / Extreme-Ultraviolet Observations of a Surge. – G. A. Dulk and M. D. Altschuler / A Moving Type IV Radio Burst and its Relation to the Coronal Magnetic Field. – G. M. Simnett / The Release of Energetic Particles from the Sun. – P. N. Pathak / Correlation of Solar Wind Velocity with $\lambda 5303$ Coronal Intensity. – P. Cortellessa, P. di Benedetto, and C. Paizis / A Search for Solar Neutrons Near Solar Maximum, II. – S. A. Volobuyev, A. M. Galper, V. V. Dmitrenko, V. G. Kirillov-Ugryumov, B. I. Luchkov, and E. M. Shermanzon / Additional Electron Flux Detection After Magnetic Perturbations. – E. Antonucci, G. Cini Castagnoli, and M. A. Dodero / Effects of Active Solar Regions on the Galactic Cosmic Ray Intensity. – A. G. Gasanalzade / On the Freundlich Red Shift.

Research Notes: S. Koutchmy and C. Macris / Observation in the Wing of the $H\alpha$ Line and Identification of the Spicular Structure Near the Solar Limb. – R. Henkel / A Feature of the Secularly Smoothed Maxima of Sunspot Frequency. – J. M. Katz / On the Solution of the Transfer Equation System for a Non-Scattering Medium with a Homogeneous Magnetic Field. – E. A. Mallia, D. E. Blackwell, and A. D. Petford / Further Study of H_2O Lines in the Umbral Spectrum in the Region of 0.93μ . – D. E. Trotter and G. Newkirk, Jr. / Coronal Magnetic Field of the Sun on 7 January 1969. – G. Elwert and E. Haug / Reply to Discussion by Kahler *et al.* – Abstracts of Forthcoming Papers. – Abstracts of Papers from Other Journals.

Subscription price per volume of 500 pages
Dfl. 111,50 (US \$34.57) including postage.

Five volumes are published yearly. Personal subscription price on request.

SPACE SCIENCE REVIEWS

Editorial Committee: Prof. W. J. G. Beynon (Penglais, Aberystwyth, Cards, Wales), Prof. C. de Jager (Utrecht), Prof. Juan G. Roederer (Denver, Colo.).

Editorial Board: S.-I. Akasofu (College, Alas.), J.-E. Blamont (Verrières, France), R. L. F. Boyd (London), L. Broglio (Rome), M. Calvin (Berkeley, Calif.), R. R. R. Daniel (Bombay), H. Friedman (Washington, D. C.), L. Goldberg (Cambridge, Mass.), W. N. Ness (Houston, Tex.), A. R. Hibbs (Pasadena, Calif.), H. C. van de Hulst (Leyden), G. H. Ludwig (Greenbelt, Md.), R. Lüst (Garching-München), G. J. F. MacDonald (Los Angeles, Calif.), H. S. W. Massey (London), B. M. McCormac (Palo Alto, Calif.), A. P. Mitra (New Delhi), J. E. Naugle (Washington, D. C.), H. E. Newell (Washington, D. C.), M. Nicolet (Brussels), T. Obayashi (Tokyo), B. J. O'Brien (Houston, Tex.), B. Peters (Lyngby, Denmark), Sir R. Peter (Cambridge, England), M. A. Pomerantz (Swarthmore, Pa.), R. W. Porter (New York), E. Rehtin (Washington, D. C.), B. Rossi (Cambridge, Mass.), L. I. Sedov (Moscow), J. A. Van Allen (Iowa City, Ia.), F. L. Whipple (Cambridge, Mass.), J. R. Winckler (Minneapolis, Minn.).

Contents of Volume 12, No. 4, November 1971

Susumu Kato / Wave Dynamics in the Thermosphere. I: Tidal Motion. – Martin Walt / The Radial Diffusion of Trapped Particles Induced by Fluctuating Magnetospheric Fields. – E. L. Chupp / Gamma Ray and Neutron Emissions from the Sun. – Book Reviews.

Subscription price Dfl. 185,- (US \$ 67.35) per volume of six issues
(postage included).

One and a half volumes are published yearly

Personal subscription price on request

WATER, AIR, AND SOIL POLLUTION

An International Journal of Environmental Pollution

Editor: B. M. McCORMAC (Palo Alto, Calif.)

Editorial Board: A. F. Agnew (Pullman, Wash.), W. Bischof (Stockholm), V. Chanasyk (Guelph, Ont.), R. J. Charlson (Seattle, Wash.), R. B. Clark (Newcastle-upon-Tyne), F. di Castri (Valdivia), W. J. Drescher (Madison, Wisc.), E. Føyn (Oslo), W. R. Gardner (Madison, Wisc.), A. J. Gilmour (Melbourne), K. Grasshoff (Kiel), G. F. Humphrey (Cronulla), R. E. Kohn (Edwardsville, Ill.), V. A. Kovda (Moscow), S. N. Linzon (Toronto, Ont.), D. H. Lucas (Leatherhead, Surrey), P. H. McGauhey (Richmond, Calif.), M. A. McWhinnie (Chicago, Ill.), W. J. Moroz (University Park, Pa.), B. J. O'Brien (Perth), H. M. Papee (Rome), K. C. Pillai (Bombay), J. E. Portmann (Burnham-on-Crouch, Essex), R. R. Prasad (New Delhi), O. Preining (Vienna), R. A. Ragotzkie (Madison, Wisc.), E. Robinson (Menlo Park, Calif.), H. Shoji (Osaka), A. C. Stern (Chapel Hill, N. C.), K. Szesztay (Budapest), G. Tendron (Paris), R. Truhaut (Paris), S. Tsuru (Tokyo), J. Ui (Tokyo), M. Waldichuk (West Vancouver, B. C.), C. S. White (Albuquerque, N. M.), R. D. Wildman (Rockville, Md.), R. Zerbe (Chicago, Ill.).

Contents of Volume 1, No. 1:

M. J. D. Low and H. Mark / SO₂ Detection by Dual Beam Fourier Transform Spectroscopy – John Eric Edinger and Edward M. Polk, Jr. / Intermediate Mixing of Thermal Discharges into a Uniform Current – Yasuo Ide / The Effect of the Observation Time on Turbulent Diffusion in the Atmosphere – Gianna L. Petriconi and Henry M. Papee / On Routine Colorimetric Determination of Trace Nitrates, by Brucine, in the Presence of Chloride – John W. Winchester and Gordon D. Nifong / Water Pollution in Lake Michigan by Trace Elements from Pollution Aerosol Fallout – Riccardo A. A. Muzzarelli and Antonio Isolati / Methyl Mercury Acetate Removal from Waters by Chromatography on Chelating Polymers – William C. Ebersole / Predicting Disturbances to the Near and Offshore Sedimentary Regime from Marine Mining – B. J. Copeland and Timothy J. Bechtel / Species Diversity and Water Quality in Galveston Bay, Texas – Irving H. Blifford, Jr. and Dale A. Gillette / Applications of the Lognormal Frequency Distribution to the Chemical Composition and Size Distribution of Naturally Occurring Atmospheric Aerosols.

Subscription price per volume of 4 issues
Dfl. 146,50 (US \$ 43.95), including postage.

Personal subscription price on request.

DORDRECHT-HOLLAND

Information for Authors

Astrophysics and Space Science is a journal opened primarily to original contributions from the entire domain of astrophysics and allied fields of cosmo-chemistry, dynamics, etc.—stellar, galactic and extragalactic—excluding, however, the Sun; and with emphasis on topics opened up by the methods of space research. It contains observational and theoretical papers as well as those concerned with the techniques of instrumentation (ground-based optical and radio telescopes, spectrometric equipment, as well as with the instrumentation associated with balloon, rocket, or satellite astronomy). No significant contribution will be declined because of its size or number of illustrations, as long as it can be printed in a single issue of the journal. In addition, we expect to publish from time to time invited review papers in the form of critical discussions on problems of current interest; and keep a column open for Book Reviews.

Manuscripts for publication should be submitted (in duplicate) to the Editor-in-chief or any one of the Regional Co-editors; communications received by them through members of the Editorial Board can receive more expeditious treatment. In form the MSS should be typewritten (double-spaced), with a wide left-hand margin. Any unusual symbols used should be explained by pencil-written notes. The use of italics is to be indicated by single underlining; bold-face (vectors), by wavy underlining. Please make a clear distinction between the letter 'O' and the zero symbol; or between the letter 'l' and number '1'. Each page of the MS should be numbered. The first page should contain the article title, author's name and affiliation. At the bottom of this page, the number of copies, of MS pages, figures, and tables should be noted. It should also contain the complete address of the author (or the person to whom proofs are to be sent). The second page should contain an *Abstract*, written in the language of the paper, and not exceeding in length 1 printed page. Papers written in a language other than English should have an English abstract (a translation of which can be prepared by the Editors), and the use of multi-language abstracts will be encouraged. The authors of longer papers are encouraged to organize their MSS in *sections* with appropriate sub-headings (e.g., 1: Introduction; 2: Observational Data or Equations of the Problem; 3: Reduction of Observations, or Solution of Equations; 4: Discussion of the Results), numbered in Arabic numerals.

Tables are to be numbered consecutively, in Roman numerals, in order of their intended appearance in the text. Each should be typed on a separate sheet, and provided with appropriate headings.

Figures and Illustrations should be submitted in such a form as to permit reproduction without retouching. Line drawings should be done in India ink; with large enough lettering to permit reduction. All figures should be provided with a caption, numbered. Photographs for reproduction as half-tones should be glossy prints; and if they contain no legend, their orientation (e.g., North-South) should be marked on their reverse side. Authors should realize the importance of good illustrations for fuller understanding of their subject.

Units. All scientific or technical data included in the text should be stated in the metric and other absolute (c.g.s.) systems. The use of the English or other regional systems of units should be avoided.

Footnotes to appear at the bottom of a page should be reduced to a minimum, and used only when essential.

References should be collected at the end of a paper, in alphabetic and chronological order. Multi-author references (i.e., of three and more authors) in the text can be given by the name of the first author and the expression '*et al.*' suffixes *a*, *b*, etc. following the data used to distinguish more works by the same author in the same year. References at the end of the paper should contain the name and initials of the author(s), the year of publication, suitable abbreviation of the book or journal, its volume, and pages referred to. Quotation of article titles in references is optional.

Proofs. Each author will receive two galley proofs of his article from the publisher (with an annotated copy of his MS), and is requested to return one, with the MS, with corrections, to the publisher within a week (authors may use words for explanation). In the case proofs are not returned in time, they will be read by the Editor-in-chief against the second copy of the MS, and returned for production without the author's comments. The Editor-in-chief alone will read the page-proofs to ensure that corrections marked by the authors in their galleys have been properly effected. Should authors desire to make any further corrections at this stage, please communicate direct with the Editor-in-chief rather than with the publisher.

Reprints. Authors will receive automatically 25 reprints of their articles free of charge. Additional reprints (with or without covers) can be ordered at the time of the receipt of the proofs.
