The Association is a learned society founded in 1884 and incorporated by Royal Charter in 2013. The Marine Biological Association (J MBA) provides a united, clear, independent voice on behalf of the marine biological community. In 1888, the MBA opened the Plymouth laboratory at Citadel Hill.

The MBA is also a registered charity with its key aims being to promote scientific research into all aspects of life in the sea, including the environment on which it depends, and to disseminate to the public the knowledge gained. The Patron of the Association is His Royal Highness the Duke of Edinburgh, who is also an Honorary Fellow. The other Honorary Fellows are His Serene Highness Prince Albert of Monaco, Dr Sylvia Earle, Sir Tim Hunt and Professor James Lovelock.

The work of the Association is controlled by the Council, elected annually by its subscribing members.

The Marine Biological Association, under the direction of its Council, has undertaken research in all branches of marine science and many of the results have been published in this Journal. An account of the history of the first hundred years of the Association and Journal may be found in Volume 67 (1983) and 463.

Since its foundation the Association has been supported by grants from Research Councils and subscriptions and donations from private members, universities, learned societies, the Fishmongers’ Company and other public bodies.

The Plymouth Laboratory was opened in June 1908 and, since then, considerable additions have been made to the buildings, including a library, resource centre, extensive laboratory accommodation and water facilities.

The Association and the research programme are based entirely at the Citadel Hill Laboratory. The building is shared with SACOFS (Sir Alister Hardy Foundation for Ocean Science).

The Marine Biological Association retains the lease of the building on Citadel Hill and continues as a highly active scientific research society with a large international membership. The MBA manages a research programme carried out by research fellows together with scientific visitors, publishes and International Journal, Annual Report, Newsletters and organises scientific meetings.

Subscriptions can be paid by cash/cheque, direct debit from a UK bank account, or credit card. Non-subscriptions are reduced by £5 per annum if paying by direct debit.

Members of the Association have a wide range of rights and privileges including the use of post-nominals (FMBA for MBA Professional Members, and MB MBA for Professional Members, and MB MBA for Professional Members, and MB MBA for Professional Members, and MB MBA for Professional Members).

Print & Online Journal | £300.00 |

The Journal of the Marine Biological Association of the United Kingdom (J MBA) is an international journal, publishing original research and reviews on all aspects of marine biology, aiming to promote, advance and disseminate the knowledge gained.

The journal is published eightfold in 2015 (print ISSN 0025-3154; electronic ISSN 1469-7769) with the following issues:

March, June, August, September, November and December.

The 2015 subscription price (excluding VAT) of a volume, which includes all back numbers, is £1462 (US $2339 in USA, Canada and Mexico). The online-only price is £1290 (US $2067 in USA, Canada and Mexico).

The work of the Association is controlled by the Council, elected annually by its subscribing members.

The Marine Biological Association, under the direction of its Council, has undertaken research in all branches of marine science and many of the results have been published in this Journal.
