<i>Preface</i>	<i>page</i>	ix
<b>1 The scattering matrix</b>		<b>1</b>
1.1 Introduction		1
1.2 The $S$ -matrix		3
1.3 Bubble diagrams and scattering amplitudes		7
1.4 The analyticity properties of scattering amplitudes		11
1.5 The singularity structure		13
1.6 Crossing		17
1.7 The $2 \rightarrow 2$ amplitude		18
1.8 Experimental observables		24
1.9 The optical theorem		27
1.10 Single-variable dispersion relations		28
1.11 The Mandelstam representation		32
1.12 The singularities of Feynman integrals		36
1.13 Potential scattering		39
1.14 The eikonal expansion		44
<b>2 The complex angular-momentum plane</b>		<b>48</b>
2.1 Introduction		48
2.2 Partial-wave amplitudes		49
2.3 The Froissart–Gribov projection		53
2.4 The Froissart bound		55
2.5 Signature		57
2.6 Singularities of partial-wave amplitudes and dispersion relations		59
2.7 Analytic continuation in angular momentum		64
2.8 Regge poles		68
2.9 The Mandelstam–Sommerfeld–Watson transform		73
2.10 The Mellin transform		75

## CONTENTS

<b>3</b>	<b>Some models containing Regge poles</b>	<i>page</i> 78
3.1	Introduction	78
3.2	Properties of Regge trajectories	78
3.3	Potential scattering	83
3.4	Regge poles in perturbation field theory	94
3.5	Bootstraps	99
<b>4</b>	<b>Spin</b>	108
4.1	Introduction	108
4.2	Helicity amplitudes and observables	111
4.3	Crossing of helicity amplitudes	116
4.4	Partial-wave amplitudes with spin	119
4.5	The Froissart–Gribov projection	122
4.6	The Sommerfeld–Watson representation	124
4.7	Restrictions on Regge singularities from unitarity	128
4.8	Fixed singularities and SCR	130
<b>5</b>	<b>Regge trajectories and resonances</b>	133
5.1	Introduction	133
5.2	Unitary symmetry	135
5.3	The Regge trajectories	144
5.4	The analytic properties of trajectories	150
<b>6</b>	<b>Introduction</b>	153
6.1	Introduction	153
6.2	Kinematical singularities of Regge residues	154
6.3	Nonsense factors	160
6.4	Regge poles in $s$ -channel amplitudes	165
6.5	Daughters and conspirators	167
6.6	Group theoretical methods	172
6.7	Internal symmetry and crossing	175
6.8	Regge pole phenomenology	180
<b>7</b>	<b>Duality</b>	207
7.1	Introduction	207
7.2	Finite-energy sum rules	212
7.3	Applications of FESR and duality	218
7.4	The Veneziano model	222
7.5	Duality and SU(3)	229

## CONTENTS

7.6	Phenomenological implications of duality	<i>page</i> 235
7.7	Conclusions	240
<b>8</b>	<b>Regge cuts</b>	<b>242</b>
8.1	Introduction	242
8.2	Regge cuts and Feynman diagrams	243
8.3	The Reggeon calculus	253
8.4	The absorption and eikonal models	263
8.5	Evaluation of Regge cut amplitudes	273
8.6	Pomeron cuts and absorption	276
8.7	Regge cut phenomenology	281
<b>9</b>	<b>Multi-Regge theory</b>	<b>291</b>
9.1	Introduction	291
9.2	Many-particle kinematics	293
9.3	Multi-Regge scattering amplitudes	299
9.4	Multi-particle dual models	306
9.5	Multi-Regge phenomenology	316
<b>10</b>	<b>Inclusive processes</b>	<b>320</b>
10.1	Introduction	320
10.2	The kinematics of inclusive processes	321
10.3	Inclusive cross-sections	325
10.4	Mueller's generalized optical theorem	331
10.5	Fragmentation and the single-Regge limit	333
10.6	The central region and the double-Regge limit	339
10.7	Scaling and duality	345
10.8	Triple-Regge behaviour	347
10.9	Finite-mass sum rules	354
10.10	Correlations and the correlation length	357
<b>11</b>	<b>Regge models for many-particle cross-sections</b>	<b>364</b>
11.1	Introduction	364
11.2	The diffraction model	365
11.3	The multi-peripheral model	372
11.4	The multi-peripheral bootstrap	380
11.5	The generating function	384
11.6	The two-component model	387
11.7	The duality bootstrap	392

## CONTENTS

<b>12</b>	<b>Regge poles, elementary particles and weak interactions</b>	<i>page</i> 399
12.1	Introduction	399
12.2	Photo-production and vector dominance	401
12.3	The Reggeization of elementary particles	403
12.4	Fixed poles	407
12.5	Deep inelastic scattering	414
	<i>Appendix A</i> The Legendre functions	422
	<i>Appendix B</i> The rotation functions	426
	<i>References</i>	430
	<i>Index</i>	440
