Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of JMR and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advances in science or technology.

Manuscripts must be submitted to the Journal of Materials Research electronically via ScholarOne manuscripts, at the following website address: http://mc.manuscriptcentral.com/jmr. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 6½ x 9 in., paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the JMR keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to JMR who have related material under consideration or in press elsewhere should send a copy of the related material to JMR at the time of submission. While their manuscripts are under consideration at JMR, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: Journal of Materials Research occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. JMR will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author’s request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author’s responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, Journal of Materials Research, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA (for USA, Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue’s actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in Journal of Materials Research may be ordered. For information on reprints, please contact Cambridge University Press.

Individual member subscriptions are for personal use only.
Journal of MATERIALS RESEARCH

Editor-in-Chief: Gary L. Messing, The Pennsylvania State University

Associate Editor, Biomaterials: Adrian Mann, Rutgers University

Associate Editor, Metallic Materials: Jürgen Eckert, IFW Dresden, Germany

Associate Editor, Polymers and Organic Materials: Howard E. Katz, Johns Hopkins University

Guest Editor for Focus Issue: Advanced Materials For Fuel Cells
Joshua L. Hertz, University of Delaware

Principal Editors for Focus Issue:
Maria Luisa Di Vona, Università degli Studi di Roma Tor Vergata, Italy
Philippe Knauth, Aix-Marseille Université, France
Harry L. Tuller, Massachusetts Institute of Technology

Editorial Office:
Eileen Kiley Novak, Director of Communications, Materials Research Society, Warrendale, PA
Ellen W. Kracht, Publications Manager, Materials Research Society, Warrendale, PA
Linda A. Baker, JMR Editorial Assistant, Materials Research Society, Warrendale, PA
Lorraine K. Wolf, JMR Publishing Assistant, Materials Research Society, Warrendale, PA

2012 Principal Editors:
Robert C. Cammarata, Johns Hopkins University
Edwin A. Chandross, MaterialsChemistry LLC
Ping Chen, Dalian Institute of Chemical Physics, China
Yang-T. Cheng, University of Kentucky
Franz Faupel, Universität Kiel, Germany
David S. Ginley, National Renewable Energy Laboratory
Amit Goyal, UT–Battelle/Oak Ridge National Laboratory
Mikko P. Haataja, Princeton University
Himanshu Jain, Lehigh University
Suk-Joong L. Kang, Korean Advanced Institute of Science and Technology, Republic of Korea
C. Robert Kao, National Taiwan University, Taiwan
Koichi Kugimiya, Osaka University, Japan
Sharvan Kumar, Brown University
Edson Roberto Leite, Universidade Federal de São Carlos, Brazil
Yadong Li, Tsinghua University, China
Scott T. Misture, Alfred University
Paul Muralt, Ecole Polytechnique Federale de Lausanne, Switzerland
Cewen Nan, Tsinghua University, China
Nitin P. Padture, Brown University
Ian M. Reaney, The University of Sheffield, United Kingdom
Joan M. Redwing, The Pennsylvania State University
Clifford L. Renschler, Sandia National Laboratories
Winston Schoenfeld, University of Central Florida
Christopher A. Schuh, Massachusetts Institute of Technology
Don W. Shaw, The University of Texas at Dallas
Jay A. Switzer, Missouri University of Science and Technology
Mauricio Terrones, The Pennsylvania State University; and Shinshu University, Japan
Terry M. Tritt, Clemson University
Yoshishisa Watanabe, National Defense Academy, Japan
William J. Weber, University of Tennessee/Oak Ridge National Laboratory
Sam Zhang, Nanyang Technological University, Singapore
Yanchun Zhou, Aerospace Research Institute of Materials and Processing Technology, China

Introduction

Joshua L. Hertz, Maria Luisa Di Vona, Philippe Knauth, Harry L. Tuller

ARTICLES

1906–1914 New buffer layer material La(Pr)CrO₃ for intermediate temperature solid oxide fuel cell using LaGaO₃-based electrolyte film
Young-Wan Ju, Jong-Eun Hong, Junji Hyodo, Toru Inagaki, Shintaro Ida, Tatsumi Ishihara

1915–1926 Thermodynamic modeling of La₂O₃–SrO–Mn₂O₃–Cr₂O₃ for solid oxide fuel cell applications
E. Povoden-Karadeniz, M. Chen, Toni Ivas, A.N. Grundy, L.J. Gauckler

1927–1938 Molecular modeling of the morphology and transport properties of two direct methanol fuel cell membranes: Phenylated sulfonated poly(ether ether ketone ketone) versus Nafion
Ram Devanathan, Nagesh Idupulapati, Michel Dupuis

1939–1949 Optimum temperature range for the proton dynamics in H-doped BaZrO₃:Yb dense ceramics—a neutron scattering study
Aneta Slodczyk, Philippe Colomban, Daniel Lamago, Gilles André, Oumaya Zaafrani, Olivier Lacroix, Abdelkader Sirat, Frédéric Grasset, Béatrice Sala

1950–1957 Crosslinked SPEEK membranes: Mechanical, thermal, and hydrothermal properties
Hongying Hou, Brunella Maranesi, Jean-François Chailan, Mustapha Khadhraoui, Riccardo Polini, Maria Luisa Di Vona, Philippe Knauth

1958–1968 Novel sulfonated poly(ether ether ketone)/phosphonated polysulfone polymer blends for proton conducting membranes
Nedal Y. Abu-Thabit, Shaikh A. Ali, S.M. Javaid Zaidi, Khaled Mezghani

1969–1974 On the steady-state chemical potential profiles in bilayer solid electrolytes
Han-Il Yoo, Tae-Hyun Kwon, Taewon Lee

1975–1981 Low temperature proton conduction in bulk nanometric TiO₂ prepared by high-pressure field assisted sintering
Filippo Maglia, Ilenia G. Tredici, Giorgio Spinolo, Umberto Anselmi-Tamburini

1982–1991 Side-chain degradation of perfluorosulfonic acid membranes: An ab initio study
Milan Kumar, Stephen J. Paddison

1992–1999 Mechanism of La₀.₆Sr₀.₄Co₀.₂Fe₀.₈O₃ cathode degradation
Dongjo Oh, Danijel Gostovic, Eric D. Wachsman

Lei Wang, Rotraut Merkle, Yuri A. Mastrikov, Eugene A. Kotomin, Joachim Maier

2009–2016 Defects and transport in Pr₅Ce₁₋ₓO₂₋ₓ: Composition trends
Sean R. Bishop, Todd S. Stefanik, Harry L. Tuller

2017–2023 Effect of A-site substitution on electrical conductivity and microstructure of YAIO₃
Ramya Hariharan, Prakash Gopalan
