The following is a list of the questions which appeared on the paper:

1. What is meant by reflex action? Give three examples.
2. What points should a nurse attend to in the general management of a patient suffering from heart disease?
3. Describe the mental features seen in "epileptic insanity."
4. What are the special risks in cases of senile insanity, and how should they be guarded against?
5. A patient spits bright red blood. Where is it likely to come from, and how would you treat the patient till the doctor comes?
6. Describe the performance of artificial respiration.
7. What is a convulsion? In what diseases are convulsions most likely to occur?
8. What are the precautions to be observed in nursing patients suffering from consumption?
9. What are the principal conditions that lead to a progressive loss of weight?
10. What would lead you to believe that a patient suffers from hallucinations of hearing? Illustrate your answer by the signs observed in two patients known to you. Why are hallucinations of grave importance in many cases?

NURSING CERTIFICATE.

THE next examination for the Nursing Certificate will take place on Monday, the 2nd November, 1908.
