FIRST BRITISH ACADEMIC CONFERENCE IN OTOLARYNGOLOGY

This will be held at the Royal College of Surgeons of England between June 16th and 21st, 1963.

There will be formal sessions at which invited speakers will read papers, and these will be discussed.

A special feature will be seminars and revision courses conducted for small groups by known authorities on various topics in our specialty and allied subjects. These will include the basic sciences.

Information about the Conference will be sent in due course to Otolaryngological Associations and Societies overseas, and members of these will be welcome as participants.

Further notifications will appear in this Journal from time to time.

POST-TONSILLECTOMY COMFORT

Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing — it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides $3\frac{1}{2}$ grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.
