

# NEW TITLES FROM THE WORLD'S OLDEST PRESS

## Basic Marine Biology

A. A. FINCHAM

Illustrated by A. MILNE and P. STEBBING

A large-format, highly-illustrated book which aims to provide a basic grounding in marine biology for amateur naturalists and biology students. The lively text is supplemented by specially prepared line diagrams and striking black and white photographs.

*Co-published with the British Museum  
(Natural History)*

Hard covers £20.00 net  
Paperback £7.95 net

## Diving and Marine Biology

The Ecology of the Sublittoral

GEORGE F. WARNER

Over the last twenty years the aqualung has established itself as an essential research tool for marine biologists making detailed ecological studies below the low tide mark. This attractively illustrated volume celebrates the exciting new world that has been opened up, and looks in particular at the ecology of kelp forests and coral reefs.

## Algal Symbiosis

A continuum of Interaction Strategies

Edited by LYNDA J. GOFF

The contributors to this book view algal symbioses as a continuum, each interaction being as much a function of the evolutionary history of the 'players' as their present place in the system. Overemphasis on categorisation, they argue, actually obscures the true physiological and genetic nature of the interaction.

*Now in paperback*

## The Ecology of Algae

F. E. ROUND

Algal ecology and symbiosis are comprehensively examined in this substantial and stimulating survey. Professor Round looks at individual habitats, seasonal growth cycles, energy flow, dispersion and palaeoecology, stressing in particular the importance of algae in symbiotic relationships and their role in aquatic food chains.

HOLIDAY INN DENVER DOWNTOWN HOTEL  
DENVER, COLORADO**

**DECEMBER 27 - 30**

Call for Papers: April 1984  
Abstract Deadline: August 14, 1984  
For Oral and Poster Presentations

**Housing Rates:**

\$40 Single, \$48 Double or Twin at the Marriott City Center  
\$30 Single and \$36 Double or Twin at the Holiday Inn Downtown

**TENTATIVE SYMPOSIA AND REFRESHER COURSES:**

PATTERNS OF DISPERSAL AMONG MAMMALS AND THEIR EFFECTS ON THE GENETIC STRUCTURE  
OF POPULATIONS  
EVOLUTION AND DISTRIBUTION OF SOME BRAIN AND PITUITARY HORMONES  
PHYLOGENETIC ORIGINS OF HUMORAL IMMUNE MEDIATORS  
CARDIOVASCULAR ADAPTATION IN REPTILES  
CELL-CELL INTERACTIONS AND THE CELL SURFACE IN NEURAL RETINA DEVELOPMENT  
TERRITORIALITY: RECENT THEORETICAL ADVANCES, TESTS OF MODELS, AND CASE STUDIES  
CHARACTER WEIGHTING, CLADISTICS, AND CLASSIFICATION  
THE BIOLOGY AND EVOLUTION OF LUNGFISHES  
NATURALISTS AND NATURAL HISTORY INSTITUTIONS OF THE AMERICAN WEST  
PHOTOPERIODISM IN THE MARINE ENVIRONMENT  
SCIENCE AS A WAY OF KNOWING - HUMAN ECOLOGY  
REFRESHER COURSE ON LESSER-KNOWN CRUSTACEA  
REFRESHER COURSE ON BIOLOGY OF THE LESSER-KNOWN INVERTEBRATES

Hosted by University of Denver - James Platt & Dennis Barrett, Co-Chairpersons of Local Committee

Ski Aspen after the Meeting. Special rates at the Holiday Inn of Aspen will be confirmed in July (discounts up to 20%). Reservations must be made by November 15. Information available from ASZ (see address below).

# THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

## TERMS OF MEMBERSHIP

	£
Annual Members, receiving the Journal . . . per annum	15.00
Annual Members, without the Journal . . . per annum	3.00
Founders . . . . .	100.00
Governors . . . . .	500.00

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.
