New Books in Gamebird Ecology

Ecology and Management of Gamebirds

Edited by Peter J. Hudson and Michael R. W. Rands

The application of ecological principles to the management of wildlife is an important aspect of conservation biology. The practical aspects of gamebird management, however, rarely consider scientific principles. This book by leading researchers presents, for the first time, an approach to the management of gamebirds based on an ecological framework.

'The book lays before the reader a wealth of international scientific information about gamebirds'

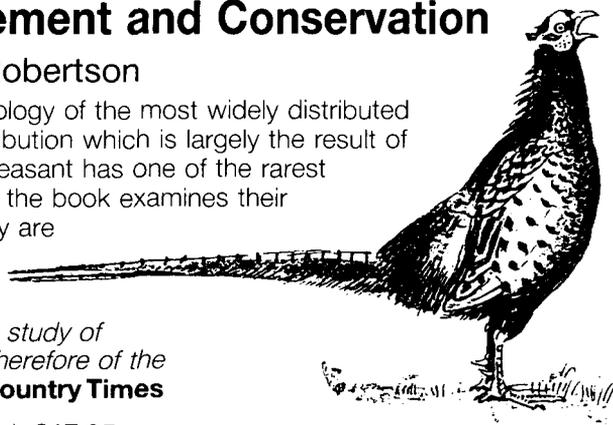

The Country Times

263 pages, illustrated paperback **£14.95**

The Pheasant Ecology, Management and Conservation

David Hill and Peter Robertson

This book investigates the ecology of the most widely distributed gamebird in the world, a distribution which is largely the result of introductions by man. The pheasant has one of the rarest breeding systems of any bird; the book examines their unusual lifestyle, and how they are influenced by man through management.

'It is the most comprehensive study of the bird undertaken yet and therefore of the utmost importance.'

The Country Times

281 pages, illustrated hardback **£17.95**

The Partridge Pesticides, Predation and Conservation

G. R. Potts

'The book is skilfully written and provides a valuable compendium of facts about the partridge and the impact on it of changing agricultural practices on arable farms ... The author and the Game Conservancy are to be congratulated on this most productive study.'

BIRDS Magazine of the RSPB

'This is undoubtedly, the single most important book on game to appear in many years.'

Country Sport Magazine

274 pages, illustrated hardback **£19.95**

To order any of these books please send your cheque plus **£1.75** p+p to the address below.

AUSTRALIAN JOURNAL OF ECOLOGY

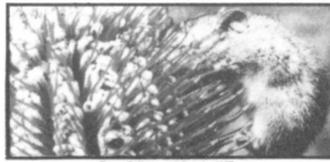

Edited by Robert J. Whelan

Michael Bull Denis O'Dowd

From Lunney and Leary 1988

Published for the *Ecological Society of Australia*, this Journal presents ecological research, methodology, critical reviews and commentaries principally of Australasian origin. Contrary to recent trends of increasing specialization in ecological journals, the *Australian Journal of Ecology* presents both descriptive and experimental ecology, conducted in a wide range of ecosystems and focusing on the whole range of living organisms. The rapidly increasing activity and interest in ecological research in Australia is providing interesting parallels and contrasts with work in other regions. In addition, much of the material presented in the Journal has an underlying theoretical base, and is therefore of direct relevance to workers in other geographical regions.

From Collins and Rebelo 1987

SOME PAPERS RECENTLY PUBLISHED OR DUE TO BE PUBLISHED IN FORTHCOMING ISSUES

- M. Westoby, B. Rice, G. Griffin and M. Friedel: The soil seed bank of *Triodia basedowii* in relation to time since fire
- E. C. Morris and P. J. Myerscough: Survivorship, growth and self-thinning in *Banksia ericifolia*
- D. W. Inouye and G. H. Pyke: Pollination biology in the Snowy Mountains of Australia: Comparisons with montane Colorado, USA
- J. Landsberg: Dieback of rural eucalypts: Tree phenology and damage caused by leaf-feeding insects
- B. G. Collins and T. Rebelo: Pollination biology of the Proteaceae in Australia and southern Africa
- P. G. Fairweather: Predation creates haloes of bare space among prey on rocky seashores in New South Wales
- R. P. Kavanagh: The impact of predation by the powerful owl, *Ninox strenua*, on the population of the greater glider, *Petauroides volans*
- G. L. Moss and D. B. Croft: Behavioural mechanisms of microhabitat selection and competition among three species of arid zone dasyurid marsupial
- D. J. O'Dowd and J. A. Edgar: Seasonal dynamics in the pyrrolizidine alkaloids of *Heliotropium europaeum*

Subscription Rates The Journal is published quarterly and the subscription rates for 1989 are A\$171.00 (Australasia), UK£132.00 or US\$225.00 (overseas), per annum, post free, including delivery by surface post within Australia and by surface air lifted post elsewhere. For information about membership of the *Ecological Society of Australia*, write to: The Secretary, *Ecological Society of Australia*, PO Box 1564, Canberra, ACT 2601
