Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health. The scope of Public Health Nutrition includes food systems and supplies, patterns of diet, foods and drinks, nutrients, body composition, physical activity, and associated factors, and their effects on disease, health and well-being, and the whole living and physical world. We welcome papers that:

• Address nutritional status assessment, monitoring, and surveillance
• Identify and analyse social, cultural, biological, environmental, economic and political determinants of nutrition-related public health
• Build intelligence about the development and evaluation of environmental and settings-based interventions focused on the availability of foods including interventions in the out of home eating environment.

Aims and Scope

• Describe, discuss, debate and influence food and nutrition policy
• Focus on improving food and nutrition-related public health, particularly in populations that are most vulnerable and at risk.
• Discuss and build capacity for effective public health nutrition action, including workforce development and educational issues
• Develop and test innovative and emerging models, methods and approaches to public health nutrition practice and research.

We prefer papers that are innovative and contribute new knowledge to the literature. Papers should be succinct (ie, usually well under 5,000 words not including the abstract, references, tables, figures and acknowledgements). Short communications are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debate are also welcome. We publish special issues.

Public Health Nutrition is available on the Internet at: journals.cambridge.org/phn

Editor-in-Chief
Research Professor Marilyn Tseng
California Polytechnic State University
San Luis Obispo, USA
Email: phn@nutsoc.org.uk
Deputy Editors
Dr Allison Hodge
University of Melbourne, Australia
Dr Carl Lachat
Gent University, Belgium
Dr Eduardo Villamor
University of Michigan School of Public Health, USA

Supplement and Special Issues Editor
Dr Irja Haapala
University of Eastern Finland, Finland

Statistics Editor
Dr Graham Horgan, Rowett Institute, University of Aberdeen, UK

Systematic Reviews and Meta-Analyses Editor
Dominique Roberfroid, Institute of Tropical Medicine, Belgium

Associate Editors
Dr Lelia Azadbakht, Isfahan University of Medical Sciences, Iran
Dr Kaleb Baye, Addis Ababa University, Ethiopia
