Compact, accessible and affordable

Each chapter is sharp, clear and practical, enhanced by tables and diagrams for quick assimilation and reference on the ward or in the clinic

Coverage also includes legal and ethical issues, and the neglected topic of alcohol and drug abuse in the elderly

www.cambridge.org/medicine

Scope and contributions

International Psychogeriatrics is written by and for those doing clinical, teaching, and research work with older people. It is the official journal of the International Psychogeriatric Association (IPA) and is published by Cambridge University Press, Cambridge, UK. Although it is primarily concerned with psychogeriatrics, the journal welcomes contributions from all concerned with the field of mental health and aging. Original research papers are particularly welcome.

Contributions include: original research articles, case reports, reviews of the literature, book reviews, letters to the editor, and editorials. Apart from editorials and book reviews, which are commissioned, contributions to International Psychogeriatrics are anonymously submitted and written by authors. Papers are reviewed by two expert reviewers selected by the Editor-in-Chief. As a present, about half of the papers submitted are accepted for publication. The journal’s Science Citation Index impact factor is 2.28 (2021). Submission of a paper implies that it is neither under consideration for publication elsewhere, nor previously published in English. Manuscripts must be formatted double-spaced with ample margins on all sides and the pages should be numbered. International Psychogeriatrics uses the spelling of American English. Manuscripts written by those whose primary language is not English should be edited carefully for language prior to submission. This journal has a Language Assistance Panel consisting of both native English speakers willing to check manuscripts only prior to submission, and bilingual experts willing to assist with the translation of manuscripts into English. Further details including contact information for individual panel members can be found at both the journal and IPA websites (journals.cambridge.org and www.ipa-online.org).

An up-to-date version of the journal’s instructions for contributors can be found at the International Psychogeriatrics website: journal.cambridge.org. Please read these instructions carefully before submitting articles. Articles that are not prepared in accordance with these guidelines will be returned to authors.

Manuscripts should be submitted online via our manuscript submission and tracking site, http://mc.manuscriptcentral.com/ipg. Full instructions for electronic submission are available directly from this site.

Important Addresses

Office of the Editor-in-Chief
International Psychogeriatrics

Leeds General Infirmary, St Stephen’s AU5 1AB

Email: ipg@ipa-online.org

Due to the large number of inquiries from authors and organizations, the following guideline has been established in order to provide a timely response:

We apologize for any delay in responding to queries. For journal publication, please contact the Editorial Office at the address above. For information on book reviews, please contact the Managing Editor. For queries related to unsolicited manuscripts, please contact the Editor-in-Chief. For information on advertising, please contact the Advertising Department. For information on subscriptions, please contact the Subscription Department.
