## THE REFLEXIVE THESIS

*Wrighting Sociology of Scientific Knowledge*

**Malcolm Ashmore**

## THE RISE OF THE WAVE THEORY OF LIGHT

*Optical Theory and Experiment in the Early Nineteenth Century*

## **DISCOVERING**

*Robert Scott Root-Bernstein*

Great science: how is it done? Who taught our most brilliant discoverers, and can future problem solvers learn to think as creatively? A fictional symposium of six friends pursues such core questions in this MacArthur Prize-scholar's novel approach to the science of science.

"In this important, original work, Dr. Root-Bernstein challenges us to reexamine our assumptions about how new scientific ideas emerge and evolve, and how we can best foster this process. This book should be read by apprentice and administrator alike." —Jonas Salk
