Table of Contents

Sums of distinct integral squares in $\mathbb{Q}(\sqrt{2}), \mathbb{Q}(\sqrt{3})$ and $\mathbb{Q}(\sqrt{6})$
Kim, J. Y. & Lee, Y. M. 1

The classification of some modular Frobenius groups
Fan, J., Du, N. & Zeng, J. 11

The invariants field of some finite projective linear group actions
Chen, Y. 19

Small essential spectral radius perturbations of operators with topological uniform descent
Zeng, Q., Zhong, H. & Wu, Z. 26

On tensor products of weak mixing vector sequences and their applications to uniquely $E$-weak mixing $C^*$-dynamical systems
Mukhamedov, F. 46

Binding number and minimum degree for fractional $(k,m)$-deleted graphs
Zhou, S., Bian, Q. & Xu, L. 60

Two approaches to M"obius inversion
Huang, I-C. 68

Sumsets and difference sets containing a common term of a sequence
Yang, Q.-H. & Chen, Y.-G. 79

The boundary volume of a lattice polytope
Heged"us, G. & Kasprzyk, A. M. 84

Rational points on three superelliptic curves
Shen, Z. & Cai, T. 105

Note about Lindel"of $\Sigma$-spaces
Ka"kol, J. & L´opez-Pellicer, M. 114

A new construction for pooling designs
Jin, F., Zhou, H. & Xu, J. 121

Jensen type inequalities for $Q$-class functions
Moslehian, M. S. & Kian, M. 128

Essential commutativity of some integral and composition operators

Power-free values of the polynomial $t_1 \cdots t_r - 1$
Le Boudec, P. 154

On the degree distance of some composite graphs
Hua, H. 164

Corrigendum/Erratum
Correction to 'Decomposing linear transformations'
Wang, L. & Zhou, Y. 172

Abstracts of Australasian PhD theses
Domain perturbation for parabolic equations
Sa Ngiamsunthorn, P. 174
