EDITORIAL BOARD

FOUNDING EDITOR EMERITUS (1980–1983)
Sheldon Rosenberg, University of Illinois, Chicago

Applied Psycholinguistics publishes original articles on the psychological processes involved in language. The articles address the development, use, and impairment of language in all its modalities, including spoken, signed, and written, with a particular emphasis on crosslinguistic studies. Studies appearing in Applied Psycholinguistics need to have clear applied relevance to professionals in a variety of fields, including linguistics, psychology, speech and hearing, reading, language teaching, special education, and neurology. Contributors should explicitly consider the relevance of their work to the larger community, as well as its theoretical and psychological significance. Specific topics featured in the journal include language development (the development of speech perception and production across languages, the acquisition and use of sign language, bilingualism, and second language learning), language disorders in children and adults (including those associated with brain damage, retardation and autism, specific learning disabilities, and hearing impairment), literacy development (early literacy skills, dyslexia and other reading disorders, and spelling development and disorders), and psycholinguistic processing (lexical access, time course of language processing, semantics, and syntax). In addition to research reports, theoretical reviews will be considered for publication, as will keynote articles and commentaries (the latter normally invited by the Editors). The journal will occasionally publish issues devoted to special topics within its purview.

Manuscript Submission. The journal’s full Instructions for Contributors can be found online at http://journals.cambridge.org/aps. Authors should submit their manuscripts electronically at http://mc.manuscriptcentral.com/appliedpsych. All manuscripts must be accompanied by a letter stating explicitly that the authors have obtained institutional review and approval for ethical treatment of human subjects and have not simultaneously submitted this manuscript to another publication.
