CONTENTS

H. Chen, W. K. Nicholson and Y. Zhou, Unit-Regular modules 1
I. Blahota, L. E. Persson, and G. Tephnadze, Two-Sided estimates of the Lebesgue constants with respect to vilenkin systems and applications 17
Muneo Cho, Eungil Ko and Ji Eun Lee, On $\sim_\infty$-complex symmetric operators 35
Michael Bate and Alec Gallian, Asymptotic bounds for the size of $\text{hom}(A, \text{GL}_q(\mathbb{F}_2))$ 51
Hannah Vogel, And With Appendix B By Anna Felikson and Pavel Tumarkin, Asymptotic triangulations and corner transformations of the annulus 63
Constantin N. Beli, Florin Stan and Alexandru Zaharescu, An effective bound for the cyclotomic torsion-kojihara rank 97
Julia Sauter, From complete to partial flags in geometric extension algebras 111
Antara Bhar and Amit K. Kurn, Compact factorization of operators with $\mathcal{L}$-compact adjoints 123
S. R. López-Pernou, J. Mastromatteo, V. Tolouei And B. Unger, Pure-Injectivity from a different perspective 135
Azadeh Nikou and Anthony G. O’Farrell, Ditkin conditions 153
Daisuke Kishimoto and Mitsuoobu Tsutaya, Samelson products in $p$-regular $\text{so}(2n)$ and its homotopy normality 165
J. J. Nuno-Ballesteros, B. Oréfice-Okamoto and J. N. Tomazella, Non-negative deformations of weighted homogeneous singularities 175
Ramses Fernández-Valencia and Jeffrey Giansiracusa, On the hochschild homology of involution algebras 187
Ruben A. Hidalgo And Saúl Quispe, A note on the connectedness of the branch locus of rational maps 199
Vitaly Roman’kov, Polycyclic, metabelian or soluble of type (fp) groups with boolean algebras of rational sets and biautomatic soluble groups are virtually abelian 209
David Kalaj, Schwarz lemma for holomorphic mappings in the unit ball 219
Benjamin Klopsch and Matteo Vannacci, The lower rank of direct products of hereditarily just infinite groups 225
Xiaobui Zhang and Libing Dong, Braided mixed datums and their applications on hom-quantum groups 231
Zhihua Wang, Libin Li and Yinhuo Zhang, A criterion for the jacobson semisimplicity of the given ring of a finite tensor category 253
The Glasgow Mathematical Journal is the continuation of the Proceedings of the Glasgow Mathematical Association. It was founded in 1952 by the late Professor T. M. MacRobert and published with the support of the University Court of the University of Glasgow. The present name was adopted in 1967 and since 1987 the Journal has been owned by the Glasgow Mathematical Journal Trust, an independent charitable trust (Scottish Charity Number SC006017).

Editorial Policy
The Glasgow Mathematical Journal publishes original research papers in any branch of Pure or Applied Mathematics. Its policy is to feature a wide variety of research areas and it welcomes the submission of papers from all parts of the world. Selection for publication is on the basis of reports from specialist referees commissioned by the Subject Editors or Editor-in-Chief.

Submission of Manuscripts
The journal uses an online submission and referencing system operated by ScholarOne Manuscripts. Details on how to submit a paper may be found at http://mc.manuscriptcentral.com/gmj.

When submitting a paper you will be asked to nominate a subject editor. The current subject editors and their areas of interest are as follows:

SUBJECT EDITORS:

<table>
<thead>
<tr>
<th>Area</th>
<th>Editor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Algebra</td>
<td>Dr. J. Grabowski</td>
</tr>
<tr>
<td>Algebraic Topology</td>
<td>Dr. A. J. Baker</td>
</tr>
<tr>
<td>Algebraic Geometry</td>
<td>Professor G. Brown</td>
</tr>
<tr>
<td>Analysis</td>
<td>Professor V. Mazorchuk</td>
</tr>
<tr>
<td>Differential Geometry</td>
<td>Dr. J. Chajek</td>
</tr>
<tr>
<td>Mathematical Physics</td>
<td>Professor G. Brown</td>
</tr>
<tr>
<td>Number Theory</td>
<td>Professor D. A. Skalski</td>
</tr>
</tbody>
</table>

You should choose a subject editor closest to your field. Alternatively you may nominate the Editor-in-Chief, Prof. J.A.BStrachan, who will assign a Subject Editor to deal with your submission.

During the submission process you will be asked to confirm that the paper is not being considered for publication elsewhere. The Journal encourages the use of author-editable latex or dfx files. LaTex and Postscript as well as other formats can be uploaded but these will be converted into pdf format. Note that .dfx files cannot be converted. Care should be taken with this option, especially if non-english language is used. The paper may be uploaded in English, French, German, Italian, Spanish or Dutch.

The submission of hard copy is discouraged. However if it is not possible for you to use the online system paper may be sent directly to: The Editorial Office, Glasgow Mathematical Journal, University of Glasgow, School of Mathematics and Statistics, University Gardens, Glasgow G12 8QW, UK at hardcopy or on a 3.5 disk or by e-mail to: gmj@maths.gla.ac.uk. Most electronic formats, including TeX source with .dfx or pdf files, are acceptable. In the case of a hardcopy submission, two copies should be sent. Submission of manuscripts should be accompanied by the author's address, telephone, and fax number, together with (if possible) an e-mail address. Upon acceptance of a paper, the author will be asked to transfer copyright to the Glasgow Mathematical Journal Trust.

Layout of manuscripts
Papers should be typed or word-processed in double spacing throughout, with wide margins and on one side of the paper. They should be prepared so as to conform to the practice in current issues of the Journal as regards general layout, references, tables and figures. Please avoid footnotes if possible. Papers must begin with an abstract of not more than 200 words, and they should list at least one AMS 2010 classification number or keyword. This information is also required before your manuscript can be uploaded. Instructions regarding unusual symbols or any typographical point that might cause confusion should be provided on a separate sheet. These may be uploaded as separate files. If special fonts are used, they should conform to the Journal's practice. Authors are reminded that they should retain a copy of anything submitted for publication since neither the Journal nor the publisher can accept liability for any loss.

Illustrations
Text figures must be suitable for direct photographic reproduction and supplied separate from the text but allocated clearly to sections of the text. Low resolution version may be uploaded at submission as separate files. Originals of figures should not be sent until the paper has been accepted. A list of captions for figures should be attached separately.

References
References should be placed at the end of the paper, arranged and numbered in alphabetical order of the author’s names. Titles of journals should be abbreviated in Mathematical Reviews. In the text, reference numbers should be enclosed in square brackets to distinguish them from formal numbers which should be quoted in round brackets. A reference to a book should give the author, title, date of publication (in italics), series number (if any), volume number, year, and the beginning and end pages of the paper; e.g. [1] J. P. T. Johnstone, Stone Spaces, Cambridge Studies in Advanced Math. no. 5 (Cambridge University Press, 1982).

Proofreading
Prior to publication sets of proofs of each paper will be sent to authors. For papers with more than one author the proofs are sent to the first named author unless the Editors receive other instructions. Authors should be prepared to make corrections promptly. Typographical or factual errors may only be changed at proof stage. The publisher reserves the right to charge authors for excessive corrections of typographical errors. No page charge is made.

Offprints
No paper offprints are provided, but the corresponding author will be sent the pdf of the published article. Print offprints may be purchased at extra cost at proof stage.

Grants
The Glasgow Mathematical Journal Trust Fund offers grants in support of mathematical projects and events of demonstrable benefit to mathematics in Scotland. Further details and application forms can be obtained from the Business Manager or from the World Wide Web at www.maths.gla.ac.uk/gmj/grants/index.html.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world’s forests. Please see www.fsc.org for information.

Printed in the UK by Bell & Bain Ltd., Glasgow.
