Computational evaluation of the Traceback Method

Rispens, Judith E. & De Bree, Elise H.
Past tense productivity in Dutch children with and without SLI: the role of morphophonology and frequency

Brief Research Report

Depaolis, Rory A., Vihman, Marilyn M. & Keren-Portnoy, Tamar
When do infants begin recognizing familiar words in sentences?
The journal publishes material on all aspects of the scientific study of language in children—the principles which underlie it, and the theories which may account for it. Articles can report findings from naturalistic observations or experiments; and the subject-matter may include phonology, phonetics, morphology, syntax, vocabulary, semantics, pragmatics, sociolinguistics, or any other recognized facet of language study. Articles may concern the acquisition of one language, or they may have a crosslinguistic focus; they may relate to the study of individuals or of groups of children. Articles should make a theoretical, conceptual and/or methodological advance in our understanding of language development in children.

Abstracting

The journal is covered by relevant abstracting and indexing services including:
- Abstracts in Anthropology
- Association for Education and Rehabilitation of the Blind and Visually Handicapped Yearbook
- Applied Social Sciences Index & Abstracts
- Bibliography of Developmental Disabilities
- Child Development Abstracts
- Communication Abstracts
- Current Contents
- Current Index to Journals in Education
- Education Index
- Education Resources Information Center (ERIC)
- Language Teaching
- Linguistic Abstracts
- Linguistic Bibliography
- Linguistics and Language Behavior Abstracts
- Psychological Abstracts
- Sage Family Business Abstracts
- Social Science Citation Index

This journal is included in the Cambridge Journals Online service which can be found at journals.cambridge.org/jcl.
