Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

Genetics Research

Editor-in-Chief

T. F. C. Mackay, North Carolina State University, USA

Executive Editors

D. J. Finnegan, University of Edinburgh, UK

William G. Hill, University of Edinburgh, UK

Shizhong Xu, University of California, USA

Genetics Research is a key forum for original research on all aspects of genetics. Building on the success and history of its previous incarnation, *Genetical Research*, the journal has a publishing remit that provides comprehensive coverage of subjects vital to the field, including: evolutionary and population genetics, genetics of complex traits, quantitative and statistical genetics, bioinformatics, genomics, molecular and developmental genetics, Evo-Devo, conservation genetics and environmental genetics.

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.
Email: brian.dale@virgilio.it or to
- Jacques Cohen, North American Editor, *Zygote*, Tycho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA
Email: jc@embryos.net or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.
Email: medaka-s@kdp.biglobe.ne.jp

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract of not more than

250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and ideally supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 1000 – 1200 dpi. PDF format is also accepted. When relevant, photographs should be submitted with proposed reduction or magnification indicated by a scale line on or beside, the illustration.

The places for insertion into the text should be indicated in the text as ‘Fig. 1’ etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour reproduction and printing.

More detailed information is available at:

<http://journals.cambridge.org/artworkguide>

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form ‘Table 1’ etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

ZYGOTE

The Biology of Gametes and Early Embryos

CONTENTS

ORIGINAL ARTICLES

Evaluation of different culture systems with low oxygen tension on the development, quality and oxidative stress-related genes of bovine embryos produced *in vitro*

Arias, M. E., Sanchez, R. & Felmer, R. 209

Germ cell differentiation and proliferation in the developing testis of the South American plains viscacha, *Lagostomus maximus* (Mammalia, Rodentia)

Gonzalez, C. R., Muscársel Isla, M. L., Fraunhofer, N. A., Leopardo, N. P. & Vitullo, A. D. 219

Effects of chemically defined medium on early development of porcine embryos derived from parthenogenetic activation and cloning

Cao, Z., Sui, S., Li, Y., Ji, S., Zhang X. & Zhang, Y. 229

Expression of XNOA 36 in the mitochondrial cloud of *Xenopus laevis* oocytes

Vaccaro, M. C., Wilding, M., Dale, B., Campanella, C. & Carotenuto, R. 237

Immunolocalization of BRG1–SWI/SNF protein during folliculogenesis in the porcine ovary

Lisboa, L. A., Bordignon, V. & Seneda, M. M. 243

The effects of cysteine addition during *in vitro* maturation on the developmental competence, ROS, GSH and apoptosis level of bovine oocytes exposed to heat stress

Nabenishi, H., Ohta, H., Nishimoto, T., Morita, T., Ashizawa, K. & Tsuzuki, Y. 249

Administration of cyclosporin A to recipients improves the potential of mouse somatic cell nuclear-transferred oocytes to develop to fetuses

Tsuji, T., Kato, T. & Tsunoda, T. 261

Early development of *Astronotus ocellatus* under stereomicroscopy and scanning electron microscopy

Paes, M. d. C. F., Makino, L. C., Vasquez, L. A., Fernandes, J. B. K. & Nakaghi, L. S. O. 269

Somatic cells derived from haploid larvae are feasible as donors for nuclear transplant in zebrafish. Preliminary results

Cardona-Costa, J., Pérez-Camps, M. & García-Ximénez, F. 277

Differential gene expression and developmental competence in *in vitro* produced bovine embryos

Ripamonte, P., Mesquita, L. G., Cortezzi, S. S., César de Carvalho Balieiro, J., Merighe, J. K. F., Watanabe, Y. F., Caetano, A. R. & Meirelles, F. V. 281

Regulation of fusion of the nucleolar precursor bodies following activation of mouse oocytes: roles of the maturation-promoting factors and mitogen-activated protein kinases

Li, J.-J., Lian, H.-Y., Zhang, S.-Y., Cui, W., Sui, H.-S., Han, D., Liu, N. & Tan, J.-H. 291

Differential expression of Axin1, Cdc25c and Cdkn2d mRNA in 2-cell stage mouse blastomeres

Sun, J. H., Zhang, Y., Yin, B. Y., Li, J. X., Liu, G. S., Xu, W. & Tang, S. 305
