

GENETICAL RESEARCH

EDITORIAL BOARD

C. H. WADDINGTON (*Chairman*)
CHARLOTTE AUERBACH D. LEWIS
A. GRÜNEBERG G. PONTECORVO
W. HAYES A. ROBERTSON

EXECUTIVE EDITOR

E. C. R. REEVE

Volume 1. 1960

CAMBRIDGE
AT THE UNIVERSITY PRESS
1960

Printed in Great Britain by Spottiswoode, Ballantyne & Co. Ltd.

London and Colchester

and published by the Cambridge University Press

Bentley House, 200 Euston Road, London, N.W.1

American Branch : 32 East 57th Street, New York 22, N.Y.

Agents in Conada : The Macmillan Company of Canada Limited

CONTENTS

No. 1 (February 1960)

PRITCHARD, R. H. Localized negative interference and its bearing on models of gene recombination	page 1
BARNETT, S. A. and COLEMAN, ELIZABETH M. 'Heterosis' in F ₁ mice in a cold environment	25
BEATTY, R. A. The birth weight of rabbits born after heterospermic insemination	39
DEOL, M. S., GRÜNEBERG, H., SEARLE, A. G. and TRUSLOVE, G. M. How pure are our inbred strains of mice?	50
CARTER, T. C. Mutation induced in germ cells of the foetal female mouse	59
PRINGLE, C. R. and BEALE, G. H. Antigenic polymorphism in a wild population of <i>Paramecium aurelia</i>	62
GRÜNEBERG, H. and TRUSLOVE, G. M. Two closely linked genes in the mouse	69
FALCONER, D. S. Selection of mice for growth on high and low planes of nutrition	91
SWIEZYNSKI, K. M. and DAY, P. R. Heterokaryon formation in <i>Coprinus lagopus</i>	114
SWIEZYNSKI, K. M. and DAY, P. R. Migration of nuclei in <i>Coprinus lagopus</i>	129
WADDINGTON, C. H. Experiments on canalizing selection	140
REEVE, E. C. R. Some genetic tests on asymmetry of sternopleural chaeta number in <i>Drosophila</i>	151

No. 2 (July 1960)

FAHMY, O. G. and FAHMY, M. J. Cytogenetic analysis of the action of carcinogens and tumour inhibitors in <i>Drosophila melanogaster</i> . VI. The Mutagenic cell Stage Response of the Male Germ Line to the 'Nitrogen-Mustard' Derivatives of Amino-acids, Carboxylic acids and amines	page 173
LYON, MARY F. Zigzag: a genetic defect of the horizontal canals in the Mouse	189
GRÜNEBERG, H. Genetical studies on the skeleton of the mouse. XXV. The Development of Syndactylism	196
BATEMAN, N. High Frequency of a Lethal Gene (<i>t^e</i>) in a Laboratory Stock of Mice	214
BATEMAN, N. Selective fertilization at the T-locus of the mouse	226
ROBERTS, R. C. The effects on litter size of crossing lines of mice inbred without selection	239
McLAREN, ANNE. New evidence of unbalanced sex-chromosome constitutions in the mouse	253
BOWMAN, J. C. and FALCONER, D. S. Inbreeding depression and heterosis of litter size in mice	262
COCK, A. G. Four new half-and-half mosaic fowls	275
ROBERTSON, F. W. The ecological genetics of growth in <i>Drosophila</i> . 1. Body size and developmental time on different diets	288
ROBERTSON, F. W. The ecological genetics of growth in <i>Drosophila</i> . 2. Selection for large body size on different diets	305
KNIGHT, R. L., BRIGGS, J. B., and KEEP, ELIZABETH. Genetics of resistance to <i>Amphorophora rubi</i> (Kalt.) in the raspberry. II. The genes <i>A₂-A₇</i> , from the American variety, Chief	319
AUERBACH, C. Discussion on the mutagenic effects of alkylating agents	332

No. 3 (November 1960)

ROBERTSON, FORBES W. The ecological genetics of growth in <i>Drosophila</i> . 3. Growth and competitive ability of strains selected on different diets	page 333
CARTER, T. C., LYON, MARY F. and PHILLIPS, RITA J. S. The genetic sensitivity to X-rays of mouse foetal gonads	351
REISSIG, JOSÉ L. Forward and back mutation in the <i>pyr</i> ³ region of Neurospora. I. Mutations from arginine dependence to prototrophy	356
CLARKE, JEAN M., SMITH, J. MAYNARD and TRAVERS, PAMELA. Material effects on the rate of egg development in <i>Drosophila subobscura</i>	375
BATEMAN, A. J. The induction of dominant lethal mutations in rats and mice with triethylenemelamine (TEM)	381
FOWLER, RUTH E. and EDWARDS, R. G. The fertility of mice selected for large or small body size	393
BLYTH, J. S. S. and SANG, J. H. Survey of line crosses in a Brown Leghorn flock	408
FALCONER, D. S. and ROBERTS, R. C. Effect of inbreeding on ovulation rate and foetal mortality in mice	422
COHEN, B. L. Genetics of plasma transferrins in the mouse	431
BERRY, R. J. Genetical studies on the skeleton of the mouse. XXVI. Pintail	439
GREEN, M. M. Comparative mutability of wild-type isoalleles at the white loci in <i>Drosophila melanogaster</i>	452
ELLIOTT, CHARLES G. The cytology of <i>Aspergillus nidulans</i>	462
SLIZYNSKI, B. M. Sexual dimorphism in mouse gametogenesis	477
MAGUIRE, MARJORIE P. The relation of reduplication, recombination, synapsis and chromosome coiling	487

PLATES should only be included where absolutely essential. They should be supplied as unmounted glossy prints; any lettering to be inserted on them is best indicated on a separate sketch. Please do not damage prints by writing heavily on their backs or by using paper clips.

DIAGRAMS should be about twice the size of the finished block, and the thickness of lines and size of points determined accordingly. They must be drawn in Indian ink on white Bristol Board or tracing linen; graph paper ruled in pale blue (but not other colours) is also acceptable. Lettering should be lightly inserted in soft pencil only, so that the printer can put in the finished lettering.

Legends to illustrations must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their position indicated on the typescript. It will hasten refereeing if a photograph of each diagram can be supplied with the carbon copy of the paper.

TABLES should each be typed on a separate sheet of paper and their approximate positions in the text indicated on the typescript. Each table should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion.

FOOTNOTES should be avoided where possible. They can often be incorporated into the text, in parentheses.

SYMBOLS. Italic letters should generally be adopted for both gene symbols and quantities in mathematical formulae. Bold letters add to printing costs, and should only be used where they are necessary to avoid confusion.

SPELLING should follow the *Concise Oxford Dictionary*.

REFERENCES should follow the normal usage in the journal. In the list of references at the end of the paper, titles of periodicals should be abbreviated according to the *World List of Scientific Periodicals* (third edition).

PROOFS. Two sets of single-sided page proofs, together with the typescript, of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

Proofs of short notes will only be sent to authors if time permits.

OFFPRINTS. Fifty offprints of each paper, but not of short notes, are provided free of charge. A limited number of additional offprints may be ordered on the form sent out with the proofs, provided this is returned within seven days of receipt.
