Aims and Scope: JINS is the official journal of the International Neuropsychological Society, an organization of over 3,700 international members from a variety of disciplines. Our editorial board is comprised of internationally known experts with a broad range of interests. JINS publishes empirically-based articles covering all areas of neuropsychology and the interface of neuropsychology with other areas, such as cognitive neuroscience. Theoretically driven work that has clinical implications is of particular interest.

To assure maximum flexibility and to promote diverse mechanisms of scholarly communication, the following formats are available.

Regular Research: Maximum of 5,000 words (not including abstract, tables, figures, or references) and a 200 word abstract. Regular Research papers are original, creative, high quality papers covering all areas of neuropsychology; focus may be experimental, applied or clinical.

Brief Communication: Maximum of 2,500 words (not including abstract, tables, figures, or references) and a 150 word abstract, with a maximum of two tables or two figures, or one table and one figure, and 20 references. Brief Communications are shorter research articles.

Neurobehavioral Grand Rounds: Maximum of 5,000 words with an informative literature review (not including abstract, tables, figures, or references) and a 200 word abstract. Neurobehavioral Grand Rounds are unique case studies, which are usually published with an introduction by an expert in the field to put the case into a more global perspective.

Critical Review: Maximum of 7,000 words (not including abstract, tables, figures, or references) and a 200 word abstract. Critical Reviews are reviews by experts on important topics in neuropsychology. Critical Reviews must be preapproved by the Department Editor. For consideration, please e-mail your abstract to jins@unm.edu.

Short Review: Maximum of 2,500 words (not including abstract, tables, figures, or references) and a 100 word abstract. Short Reviews are conceptually-oriented snapshots of the current state of a research area by experts in that area. Short Reviews must be preapproved by the Department Editor. For consideration, please e-mail your abstract to jins@unm.edu.

Dialogues: Maximum of 2,000 words for each segment (not including abstract, tables, figures, or references) and a 100 word abstract, with a maximum of two tables or two figures, or one table and one figure and 20 references. Dialogues provide a forum for two distinct positions on controversial issues in a point-counterpoint form. Dialogues must be preapproved by the Department Editor. For consideration, please e-mail your abstract to jins@unm.edu.

Symposia: Maximum of 5,000 words (not including abstract, tables, figures, or references) and a 200 word abstract. Symposia consist of several thematically linked research articles which present empirical data. Symposia must be pre-approved by the Department Editor. For consideration, e-mail jins@unm.edu.

Manuscripts will be returned if they exceed length requirements.

Scientific articles, including Regular Research Articles, Brief Communications, Symposia and Special Series, should include the following in the order shown: Title Page, Abstract, Introduction, Methods, Results, Discussion, References, Appendices, Acknowledgments, Tables, Figure Legends, and Figures.

The use of abbreviations, except those that are widely used, is strongly discouraged. They should be used only if they contribute to better comprehension of the manuscript. Acronyms should be spelled out at first mention. Metric system (SI) units should be used. Pages should be numbered sequentially beginning with the Title Page.

The Title Page should contain the following: the full title of the manuscript, the full names and affiliations (department, institution, city, state) of all authors, a contact address with telephone and fax numbers and e-mail address, and the word count for abstract and for manuscript (excluding title page, abstract, references, tables, and figures).

A running head should appear in the upper right hand corner of every page. It should begin with the lead author’s last name followed by the abbreviated title and end with the page number.

Abstract and Mesh Terms (Keywords) begin on page 2 and should include a brief statement of the problem, the method, the key findings, and the conclusions. Six mesh or key words not duplicated in the title should be provided, see http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=mesh.

The Introduction should begin on page 3.

The Methods section should include the following: Compliance with institutional research standards for animal or human research (including a statement that the research was completed in accordance with the Helsinki Declaration http://www.wma.net/e/policy/17-c_e.html).

Appendices and Supplemental Materials may be submitted. If the material is intended for print, include it in the single doc manuscript file. If the material will appear only online, please submit it in a separate .doc file.

The Acknowledgements Section should include a disclosure of all financial support and indicate there are no conflicts of interest. Financial support: Please provide details of the sources of financial support for all authors, including grant numbers. For example, “This work was supported by the National Institutes of Health (grant number XXXXXXX).” Multiple grant numbers should be separated by a comma and space, and where research was funded by more than one agency the different agencies should be separated by a semi-colon, with “and” before the final funder. Grants held by different authors should be identified as belonging to individual authors by the authors’ initials. For example, “This work was supported by the Wellcome Trust (A.B., grant numbers XXXX, YYYY), (C.D., grant number ZZZZ); the Natural Environment Research Council (E.F., grant number FFFF); and the National Institutes of Health (A.B., grant number GGGG, E.F., grant number HHHH).” Where no specific funding has been provided for research, please provide the following statement “This research received no specific grant from any funding agency, commercial or not-for-profit sectors.”

Tables and Figures should be numbered in Arabic numerals. Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures should be twice their intended final size and authors should do their best to construct figures with notation and data points of sufficient size to permit legible photo reduction to one column of a two-column format.

Please upload your figure (s) in either a.doc or .pdf format. Color figures are accepted with no cost. When uploading figures (color or black and white) they need only be a high enough resolution for the reviewers and editors to identify the information you are trying to convey.

The approximate position of each table and figure should be provided in the manuscript: [INSERT TABLE 1 HERE]. Tables and figures should be on separate pages. Tables should have short titles and all figure legends should be on separate pages.

Special Note Regarding Figures: If you plan to use figures or tables that have been redrawn or modified from other publications, and you are not the copyright holder, please obtain permission for this re-use. Authors should err on the side of caution and seek advice from the editorial office if they are uncertain whether to seek permission.

References: References should be in American Psychological Association, 6th Edition, style (see the examples presented below).

Text references should be cited as follows: “...Given the critical role of the prefrontal cortex (PFC) in working memory (Cohen et al., 1997; Goldman-Rakic, 1987; Perlstein et al., 2003a, 2003b) ...” with multiple references in alphabetical order. Another example is: “For example, Cohen et al. (1994,1997), Braver et al. (1997), and Jonides and Smith (1997) demonstrated ...” References cited in the text with two authors should list both names. References cited in the text with three, four, or five authors, list all authors at first mention; with subsequent citations, include only the first author’s last name followed by et al. References cited in the text with six or more authors should list the first author et al. throughout. In the reference section, for works with up to seven authors, list all authors. For eight authors or more, list the first six, then ellipses followed by the last author’s name. Examples of the APA reference style are as follows:

9th Congress of the International Neuropsychiatric Association

Treating Neuropsychiatric Illness: A Multidisciplinary Effort

September 25-27, 2013

The Congress Plaza Hotel and Convention Center
Chicago, IL

Please join us in the beautiful city of Chicago for the 9th Congress of the International Neuropsychiatric Association (INA). The Association is dedicated to increasing the understanding of brain function and human behavior with the purpose of improving care and lives of people with brain-behavior disorders. The Congress provides a forum for the exchange of knowledge and ideas among professionals in various disciplines, including but not limited to neuropsychiatry, behavioral neurology, neuropsychology, and neuroscience. The theme of the Congress is Treating Neuropsychiatric Illness: A Multidisciplinary Effort. An exciting scientific program is planned with speakers from around the world. Some of the highlights include:

Neuroscience, Memory and the Law. Dr. Michael Kopelman (UK)

The Future of Neuropsychology in Clinical Neurosciences. Dr. Neil Pliskin, PhD (USA)

Health Care Systems: A World Perspective. Dr. James Ausman (USA)

Epilepsy: Clinical, Surgical and Cross-Cultural Aspects. Dr. Andres Kanner (USA) and Dr. Michael Trimble (UK)

Please visit our website to view the rest of the program and to register for the Congress

www.inawebsite.org

Call for Abstracts:

We are welcoming submission of abstracts for poster presentations with a focus on innovative research in the areas of neuropsychiatry, neuropsychology, neuroscience, behavioral neurology, neuroradiology, and rehabilitation. Please visit our website for submission guidelines. Submission deadline is March 1, 2013.

We are looking forward to seeing you in Chicago!
Discover the benefits of JDOHaD on Cambridge Journals Online (CJO)

- Register for content alerts and receive notification when new articles are published online journals.cambridge.org/doh-alerts
- Save searches
- Search across Cambridge Books Online (CBO) and Cambridge Journals Online (CJO) simultaneously using our new faceted search functionality
- Register for updates on new developments and sample content from your ‘favourite journals’
- Easily download citations to reference management software
- Access CJO on your mobile: CJOm is optimised for smart phones and other small mobile devices

Members of DOHaD receive free access to the Journal. If you have any problems setting up your online access please contact: journals_societies@cambridge.org

Submit your research to JDOHaD
The Journal covers all aspects of research in developmental origins of health and disease (DOHaD) – from basic molecular research to health and disease outcomes, translation into policy and wider social and ethical issues.

- Global Editorial Board
- Dissemination of your research to over 5,000 libraries worldwide, including access through aid donation schemes
- Efficient online manuscript submission and tracking at ScholarOne™ Manuscripts
- FirstView publication of articles online ahead of issue and print allocation
- Generous copyright policies, compliant with all the major funding bodies
- State-of-the-art online hosting
- Forward reference linking
- Permanent record through DOI/CrossRef
- No submission or page charges
- Authors receive a free pdf of the final article

SHORT REVIEW

849 Neural Correlates of Cognitive Fatigue: Cortico-Striatal Circuitry and Effort–Reward Imbalance

E. Dobryakova, J. DeLuca, H.M. Genova, and G.R. Wylie

RESEARCH ARTICLES

854 Quantifying Cognitive Reserve in Older Adults by Decomposing Episodic Memory Variance: Replication and Extension

L.B. Zahodne, J.J. Manly, A.M. Brickman, K.L. Siedlecki, C. DeCarli, and Y. Stern

863 Acute and Subacute Changes in Neural Activation during the Recovery from Sport-Related Concussion

T.A. Hammeke, M. McCrea, S.M. Coats, M.D. Verber, S. Durgierian, K. Flora, G.S. Olsen, P.D. Leo, T.A. Gennarelli, and S.M. Rao

873 Prevalence and Characterization of Mild Cognitive Impairment in Retired National Football League Players

C. Randolph, S. Karantzoulis, and K. Guskiewicz

881 Behavioral and Cognitive Predictors of Educational Outcomes in Pediatric Traumatic Brain Injury

890 How Inhibition Relates to Impulsivity after Moderate to Severe Traumatic Brain Injury

L. Rochat, C. Beni, J.-M. Annoni, P. Vuadens, and M. Van der Linden

899 Structural and Functional Changes of the Cingulate Gyrus following Traumatic Brain Injury: Relation to Attention and Executive Skills

T.L. Merkley, M.J. Larson, E.D. Bigler, D.A. Good, and W.M. Perlstein

911 How Functional Connectivity between Emotion Regulation Structures Can Be Disrupted: Preliminary Evidence from Adolescents with Moderate to Severe Traumatic Brain Injury

925 Decreased White Matter Integrity in Neuropsychologically Defined Mild Cognitive Impairment Is Independent of Cortical Thinning

938 Cognition in Early Relapsing-Remitting Multiple Sclerosis: Consequences May Be Relative to Working Memory
