Issues include reviews of major health policy developments and medicolegal case law.

The Winter 1999 edition contains a national survey of state out-of-hospital DNR laws and protocols, and articles on the legal and ethical aspects of retrieving sperm after death or persistent vegetative state, consensus-based bioethical decision making, and fetal protection in Wisconsin's revised child abuse law.

The *American Journal of Law & Medicine* is a law review fulfilling the need to improve communication between legal and medical professionals. Issues contain articles and notes—on themes in health law and policy, and on the legal, ethical, and economic aspects of medical practice, research, and education—and reviews of significant medicolegal case law.

The Winter 1999 issue contains an article on assisted reproductive technologies and another on an international strategy to advance human rights and public health. The Summer & Fall 1999 symposium focuses on liability and privacy issues in telemedicine and electronic information sources.
