Measuring Progress and Improving Preparedness in Disaster Management

This conference will bring together individuals interested in disaster and emergency medicine/management to discuss developments in risk reduction, preparedness, and responses, and to build consensus on important related issues.

The conference will focus on risk reduction, improving preparedness, and assessing responses worldwide from prehospital care systems through post-event evaluations. There will be consensus-building workshops, debates, keynote addresses, as well as invited and free papers. Additionally, there will be several relevant pre- and post-conference workshops and courses.

Call for Papers
Only 50 papers related to the above topics will be accepted.
Abstract submission opens: March 1, 2012
Deadline for submission of abstracts: May 31, 2012

Tiny Trio (acrylic/sumi ink/paper), by Sandra Martinez

Bio
Sandra (Hackbarth) Martinez has been focused on her primitive drawing style for 30 years. The simple and graphic nature of her work lends itself to a variety of projects, from flatweave tapestries woven by her husband, Wence Martinez, to small collections of wearable- and functional-art accessories. Sandra produces her paintings on thin paper worked with layers of washes, then framed in shadow-box format so the paper becomes a fragment, an object itself.

Artist’s Statement
By September 2011, Wence and I knew we were going to New York City for the Architectural Digest Home Design Show. The first few months of winter were spent looking at what we had in stock and where we would like to fill in the gaps. We decided on the new designs, and Wence started weaving like a maniac. When I turned to my painting, I tried a new thing: scheduling. So even though I had some major ironics in the fire on a daily basis, I generally stopped by mid-afternoon and went to my painting. Before I knew it, I had a cast of characters. There is a cloudiness to them, layers that you can see through, and many have a distinct line of transformation.

Now, the shadow is falling. I am helping a loved one through Alzheimer’s disease. As more of my family and friends pass over — whatever that means — I’m looking at my figures a bit differently. They guard, and they beckon. They mark the way.

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
