British Journal of Nutrition

Published on behalf of The Nutrition Society

British Journal of Nutrition is available online at:
journals.cambridge.org/bjn

Editor-in-chief
P.C. Calder, University of Southampton, UK

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialties involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

Advancing research. Increasing access.

Informed by detailed consultation with the library and research communities, we are constantly developing our industry-leading online journals platform.

Some recent advances include:

- **Refreshed site design**, facilitating rapid access to the most relevant content.
- **New advanced search interface** and a more detailed, fielded quick search function.
- **Enriched content** in the form of multimedia companions and editorial blogs.
- **The launch of Cambridge Open Option**, our open access initiative.

Visit [journals.cambridge.org/openoption](http://journals.cambridge.org/openoption) for more information.

J. Wood, University of Cambridge, UK

Submission of Manuscripts
Manuscripts should be submitted via our online manuscript submission and tracking site, www.edmgr.com/ecp.

Full instructions for electronic submission are available directly from this site and from journals.cambridge.org/cep.
To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current email address when registering to use the system.

Full Notes for Authors are available from: journals.cambridge.org/cep, and an abbreviated version is printed at the back of this issue.

Subscriptions
Comparative Exercise Physiology (ISSN 1478-0615) is published four times a year in February, May, August and November. The subscription price for institutions of Volume 5 (2008) which includes electronic access and delivery by air is £297 (US $550 in the USA, Canada and Mexico), the electronic only price for institutions is €237 (US $438 in the USA, Canada and Mexico). Single parts are £76 (US $140 in the USA, Canada and Mexico), plus postage.

Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent, or direct to the publisher.
Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK, or in the USA, and Canada:
Cambridge University Press, Journals Fulfilment Department, 100 Brook Hill Drive, West Nyack, New York, 10904-2133.
EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country’s rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from KisoKuniya Company Ltd., P.O. Box 55, Chitose, Tokyo 156, Japan.
Copies of the journal for subscribers in the USA, Canada and Mexico are sent by air to New York to arrive with minimum delay. Periodicals postage paid at New York and at additional mailing offices. Postmaster: send address changes in the USA, Canada and Mexico to: Comparative Exercise Physiology, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10904-2133. Claims for missing issues should be made immediately on receipt of the subsequent issue.

Advertising
Advertising queries for all parts of the world except the USA, Canada and Mexico to the Journals Advertising Co-ordinator: Rebecca Curtis, advertising@cambridge.org
Address enquiries in the USA, Mexico and Canada only to: journals_advertising@cup.org

Coping
The journal is registered with the Copyright Clearance Centre, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with C. C. C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U. S. Copyright law) subject to promotional or commercial purposes. Code 1478-0615/2008 $16.00. All Other Short Term Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.
Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.
For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Internet Access
The online edition is available at: journals.cambridge.org/cep with free table of contents alert (upon registration).

Notes for Authors

Comparative Exercise Physiology (CEP) provides a forum for presenting the results of research related to understanding and improving animal exercise and performance. Research into all animals, including humans, will be welcome. The key areas the journal will concentrate on include: exercise physiology, biometrics and gait (including the effect of riders), nutrition and biochemistry, pathology, physiology and behaviour, breeding and genetics. Other areas for consideration include pharmacological and doping, ageing, environment, transport and any other research relevant to exercise and athletic performance.

Styles of Paper
CEP publish four types of paper:
1) Full research papers. A full account of a complete project with experimental details.
2) Short communications. A preliminary account of exciting new results for which work is ongoing. Indicative experimental summaries should be included.
3) Research notes. Short accounts of small projects that might not merit a full paper (e.g. undergraduate research projects or minor aspects of a PhD. thesis). These might include technical notes.
4) Reviews. Literature overviews of recent research in a larger subject or comparative reviews of related work in different species.
In addition to these four types we also welcome ‘Letters to the Editor’ with comments on recently published papers to encourage a dialogue between readers and researchers.
Please indicate the type of paper you are submitting.

Technical and Nomenclature Standards
All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on present usage.

Peer Review
All contributions will be reviewed by at least two referees to ensure both accuracy and relevance. You should submit the names and contact details (including email addresses) of at least two, and up to four, potential referees for your paper.

Submission of Manuscripts
Manuscripts should be submitted online via our manuscript submission and tracking site, www.edmgr.com/ecp.
Full instructions for electronic submission are available directly from journals.cambridge.org/cep. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current email address when registering to use the system.

Final Manuscript Preparation
If your manuscript is accepted, you should supply the final paper as a Word document with separate files for electronic submission. When submitting the final version please specify the software used for word processing and illustrations and identify the operating system used (PC, Mac, Unix etc.). We kindly ask that you follow the instructions below for the final version. Please use double line spacing and ample margins and separate each paragraph by a half line numbering each page. Do not indent the start of each paragraph or use underlining. Please use italics for taxonomic nomenclature and only use bold for headings and standard abbreviations (e.g. Fig. and Figs) and SI units.

Arrangement of Papers
Please arrange your paper in the following order:
1) Title page. Article title, authors addresses (one author should be identified for correspondence), and abstract. 2) The text, divided under appropriate headings.
3) Acknowledgments (if appropriate).
4) References. Tables (each on a separate sheet).
6) Captions to illustrations (group on a separate sheet or sheets).
7) Illustrations, each on a separate sheet or as separate files.

Tables
Tables should be in a simple form. They should not be used if text or illustrations give the same information. Each table must be accompanied by a clear and concise caption.

Illustrations
Please create figure text, line drawings, computer-generated figures and graphs are of sufficient size and quality to allow for reduction. Please avoid the use of grey tints or complex hatching and only use halftone photographs where they make a real contribution to the text. Please inform the Editor at the earliest opportunity if you wish to use colour illustrations (we will ask you to pay in advance for the use of colour, but we can advise on how this can be kept to a minimum).

References
References should be in the Vancouver system, i.e. sequential numbering in the text and corresponding reference list. Reference numbers should be raised superscripts. You should use the following conventions when providing the full citations in the reference list.

Ethics
The authors must demonstrate that the experimental procedures employed conform to the accepted principles of animal welfare in experimental science. Please see the CEP website for more details (journals.cambridge.org/cep).

Copyright
Papers are accepted on the understanding that the work has been submitted exclusively to the journal and has not been previously published. There will be supplied with a transfer of copyright form with their proofs, this must be completed and returned to the Publisher.
Note that it is the author’s responsibility to ensure that permission has been obtained from the copyright owner if you wish to reuse any figures or illustrations from previously published work.

Proofs
We will contact, and send page proofs for correction, to the first named author unless you indicate otherwise.

Offprints
The corresponding author will be sent a PDF file of the final published article for use. There will also be an option to purchase offprints.
For a more detailed Notes for Authors please visit: journals.cambridge.org/cep.
## CONTENTS

### SHORT COMMUNICATIONS

- **Comparison between a sensor (3D accelerometer) and ProReflex motion capture systems to measure stride frequency of horses on a treadmill**
  - K Nankervis, D Hodgins and D Marlin 107

- **The effects of training aids on the longissimus dorsi in the equine back**
  - S Cottriall, P Ritruechai and JM Wakeling 111

### RESEARCH PAPERS

- **Inflammatory responses to three modes of intense exercise in Standardbred mares – a pilot study**
  - ED Lamprecht, CA Bagnell and CA Williams 115

- **Effect of water temperature on heart rate of horses during water treadmill exercise**
  - KJ Nankervis, S Thomas and DJ Marlin 127

- **Effects on fluid balance, digestion and exercise response in Standardbred horses fed silage, haylage and hay**
  - S Muhonen, JE Lindberg, J Bertilsson and A Jansson 133

- **Is the second week post-race an adequate period to assess the effect of a long-term conditioning on digestive physiology in competing endurance horses?**
  - AG Goachet, C Philippau, M Varloud and V Julliand 143

- **Pre-competitive levels of arousal and self-confidence among elite and non-elite equestrian riders**
  - IA Wolframm and D Micklewright 153

- **Regional variation in the flexural properties of the equine hoof wall**
  - AM Goodman and L Haggis 161
