Aims and Scope

The British Journal of Nutrition is an international, peer-reviewed journal publishing original papers, review articles, and technical notes on the multidisciplinary nature of nutritional science and the submission of material from all of the specialists involved in research and clinical practice. The journal also publishes supplements on topics of particular interest.

Instructions for Authors

The British Journal of Nutrition is published twice monthly by Cambridge University Press on behalf of The Nutrition Society. The British Journal of Nutrition is available online to subscribers at journals.cambridge.org/bjn

Tables of contents and abstracts are available free at the same website. There is also a student membership scheme with reduced subscriptions. Please contact Sarah Maddox at the Cambridge address for further details. E-mail: special_sales@cambridge.org

Systematic Reviews

Vitamin C intake in relation to bone mineral density and risk of hip fractures and osteoporosis: a systematic review and meta-analysis of observational studies
H. Malin, C. Vidal-Price, K. M. Clarke 847-858

Dietary patterns and cardiometabolic risk factors among adolescents: systematic review and meta-analysis

Meta-analysis and Meta-Analysis Studies

Systematic review of the nutrient content and the concentration of aromatic acids in foods contaminated with lead and arsenic
R. G. K. Rezayi 880-886

Genetic polymorphisms of CYP2C9 and CYP2C19 affect the efficacy of clopidogrel in patients with hypercholesterolaemia

Microbiology

High-energy-density-related intestinal damage is protected by fermented milk supplemented with whey protein, probiotics and pomegranate (Punica granatum L.)

Human and Clinical Nutrition

A carbohydrate-reduced high-protein diet acutely decreases postprandial and diurnal glucose excursions in type 2 diabetes patients: a randomised controlled trial

Eating frequency is inversely associated with BMI, waist circumference and the proportion of body fat in Korean adults when diet quality is high, but not when it is low: analysis of the Fourth Korea National Health and Nutrition Examination Survey (KNHANES IV)
S. Kim, J. H. Yang & G.-H. Park 918-927

Dietary Surveys and Nutritional Epidemiology

Vitamin D deficiency and insufficiency among US adults: prevalence, predictors and clinical implications
X. Liu, A. Bagir & D. D. Licz 928-936

Carbohydrate, dietary glycaemic index and glycaemic load, and colorectal cancer risk: a case–control study in China

Dietary patterns within educational groups and their association with CHD and stroke in the European Prospective Investigation into Cancer and Nutrition–Netherlands cohort

Glucosinolate and isothiocyanate intakes are inversely associated with breast cancer risk: a case–control study in China

Dairy product subgroups and risk of type 2 diabetes
T. Kawada 965-965

Corrigendum

Relationship between plasma 25-hydroxyvitamin D and leucocyte telomere length by sex and race in a US study

Letter to the Editor

Relationship between plasma 25-hydroxyvitamin D and leucocyte telomere length by sex and race in a US study
