The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR

LIONEL TAYLOR

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organization, 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks are provided free up to the limit of £10 per article; beyond this authors are expected to pay half the cost. Coloured illustrations will be charged in full to authors.

Blocks will normally be held by the Printers for three years after which they will be destroyed. Any author who has borne a part of the cost of his blocks is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS, 109 Kingsway, London, WC2.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, WC2.

8. The annual subscription is five guineas sterling (U.S.A. \$15) post free, and payable in advance.

9. Single copies will be on sale at 12s. 6d. each; copies of parts up to Vol. LXIII which are available may be purchased at 7s. 6d. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS, 109 KINGSWAY, LONDON, WC2.

United States of America

Orders for this *Journal* may be sent through local bookseller, or to STECHERT-HAFNER, INC., 31-33 East 10th Street, New York, or direct to the publishers, HEADLEY BROTHERS, 109 KINGSWAY, LONDON, WC2, England.

Staphylococci

cannot live with

Orbenin

Orbenin is recommended for the immediate treatment of all Hospital Staphylococcal infections

Orbenin, an oral penicillin stable to penicillinase, is bactericidal to resistant and sensitive staphylococci

Orbenin (regd.) (cloxacillin sodium) is a product of British research at
Beecham Research Laboratories

Elliott—UniBristol

ULTRASONIC SURGICAL THERAPY EQUIPMENT

PROBE—2mm. diameter beam produced by micro-cone concentrator gives precisely controlled energy pattern ■ Incorporates saline irrigation tube ■ Built-in thermistor thermometer monitors saline temperature ■ Finished in stainless steel and sealed for autoclave sterilisation

GENERATOR—Output variable—(meter indicates in Acoustic Watts/cm²)
 ■ Nominal frequency 3Mc/s (tuning facility provided)
 ■ Incorporates 60-minute manual re-set timing clock

ACOUSTIC BALANCE—an acoustic radiation balance is provided for calibration of energy output

The Elliott-UniBristol Ultrasonic equipment is based on a design due to the Physics Department of the United Bristol Hospitals and developed in conjunction with the surgeons of the ENT Department

new antibiotic
LOCABIOTAL*
now curbs
respiratory infections
and inflammation

Locabiotol contains fusafungine, a single agent that controls infection *and* inflammation of the respiratory tract. Bronchitis and bronchiectasis both respond extremely well to pressurized Locabiotol; intranasal medication gives quick control in rhinitis and sinusitis. Locabiotol does not produce the resistance which is to be expected with some systemic antibiotics.

Pressurized Locabiotol (0.25% fusafungine) 15 ml. containers providing 300 metered doses.

With oral and nasal applicators.

Basic N.H.S. Price 18/- each
(Cost of one week's treatment 4/6) Refill 15/10.

Locabiotol Nasal Spray (0.5% fusafungine) in Nebulizers of 15 ml. for E.N.T. treatment.

Basic N.H.S. Price 7/- each.

Selpharm Laboratories Limited
15 Hanover Square London W1

ONLY AMPLIVOX
 provides a
complete audiometric service!

Transistor Audiometers

for the school screening service, ward use, etc.

Speech Audiometry Equipment

via records and tape, including new attachment for use with tape recorders.

Industrial Audiometry
 Speech Training Equipment
 Loop Amplifiers, etc., etc.

Clinical Audiometers

with narrow band masking for the highest accuracy and extended resolution.

Audiometer Booths

for ideal testing conditions in Hospitals, Clinics, Factories. Standard and special sizes available.

PLUS An efficient and speedy **calibration service**

'OTOSPORIN'

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' Drops. 'Otosporin' is an aqueous suspension containing neomycin and polymyxin B which are together effective against practically all the bacteria found in ear infections. In addition, it contains hydrocortisone to reduce inflammation and swelling, thereby providing easier access for the antibiotics.

'OTOSPORIN' BRAND **Drops** ISSUED IN BOTTLES OF 5 ml.
