Senior Editors

Julian Wiseman, University of Nottingham, UK

Animal papers

Robert E. L. Naylor, University of Aberdeen, UK

Crop & Soil papers

The Journal of Agricultural Science publishes papers concerned with the advance of agriculture and the use of land resources throughout the world. It publishes original scientific work related to strategic and applied studies in all aspects of agricultural science and exploited species, as well as reviews of scientific topics of current agricultural relevance.

Editor-in-Chief

Michel Doreau, INRA, France

animal publishes original cutting-edge research, 'hot' topics and horizon-scanning reviews on animal-related aspects of the life sciences at the molecular, cellular, organ, whole animal and production system levels. The main subject areas include: breeding and genetics; nutrition; physiology and functional biology of systems; behaviour, health and welfare; farming systems, environmental impact and climate change; product quality, human health and well-being.

Editor-in-chief

P.C. Calder, University of Southampton, UK

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

Editor

Dave Harris, Bangor University, UK

Experimental Agriculture publishes the results of original research from any source on the agronomy of field, plantation and herbage crops grown for human or animal food; for industrial purposes; and on systems of agricultural production, particularly in the warmer regions of the world. It is especially concerned with experimental work designed to explain agronomic results in biological and environmental terms. The journal publishes accounts of new experimental techniques, new methods of crop production and discusses problems in countries where production is developing rapidly. There are regular book reviews.

Editor

H. W. M. Hilhorst, Wageningen University, The Netherlands

Seed Science Research, the official journal of the International Society for Seed Science, is a leading international journal featuring high-quality original papers and review articles on the fundamental aspects of seed science, reviewed by internationally distinguished editors. The emphasis is on the physiology, biochemistry, molecular biology and ecology of seeds.

Notes for Authors

Renewable Agriculture and Food Systems publishes original research on biological, physical, or social science aspects of alternative and renewable agriculture and food systems. We particularly welcome multidisciplinary studies, but papers from a specific discipline are also invited. However, since *RAFS* readership is much broader than for a single-discipline journal, highly specialized terminology should be explained or avoided. The significance of a statement, or the reasoning behind a conclusion, may have to be spelled out more than in a more specialized journal. See journals.cambridge.org/raf for an explanation of the various categories of articles.

Units. Research papers should use the International (SI, or metric) system throughout. Occasional use of common unit equivalents in parentheses is permitted.

Title Page. The title page should give the following information (all flush left): 1) title of the paper; 2) names of the authors; 3) affiliation and office address of authors, e-mail of corresponding author, and 4) disclaimers, if any.

Abstract. The abstract should be 200 to 400 words, suitable for readers from a broad range of disciplines. It should avoid highly-specialized terminology that might be appropriate for a single-discipline journal. Take particular care that the significance of the work is made clear, even to readers from a different field.

Key Words. Provide subject matter key words suitable for use in scientific indexing.

References. References are based on the Vancouver system. They should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals. Where a reference is cited more than once in the text, use the same number each time. In the reference list please give the names of all authors in the reference, never use "et al." Use full names of journals, institutions, conferences, etc. The reference list uses no quotation marks, italics, boldface or underlining. Only the names of books and periodicals are in initial capitals. Names of papers, book chapters, pamphlets, and bulletins are not capitalized.

Examples:

1. Leopold, A. 1991. The farmer as a conservationist. In S.L. Flader and J.B. Callicott (eds). *The River of the Mother of God and Other Essays* by Aldo Leopold. University of Wisconsin Press, Madison, WI. p. 255–265.
2. Brink, R.H. Jr, Dubach, P., and Lynch, D.I., 1960. Measurement of carbohydrates in soil hydrolyzates with anthrone. *Soil Science* 89:157–166.
3. Greenland, D.J., and Szabolcs, I., (eds). 1994. *Soil Resilience and Sustainable Land Use*. CAB International, Wallingford, UK.
4. Arshad, M.A., and Coen, G.M., 1992. Characterization of soil quality: Physical and chemical criteria. *American Journal of Alternative Agriculture* 7:25–31.
5. Coale, F.J. 1996. Descriptions of the soil test interpretive categories used by the University of Maryland Soil Testing Laboratory. SFM-3. University of Maryland, College Park.

Footnotes. *RAFS* does not use bibliographic or substantive footnotes. All bibliographic references should be at the end of the text. Instead of substantive footnotes, include the material in the main text or consider eliminating it.

Manuscript Preparation. The entire manuscript, including abstract and references, should be typed on one side of standard-size paper, double spaced, with margins of at least one inch all around. Starting with the title page, label all pages in the upper right-hand corner with the lead author's last name and the page number. Add line numbers to your manuscript, restarting numbering for each page. Do not use hyphens unless the hyphen is part of the word. Indicate on the title page who the corresponding author is, and supply a present postal address, fax number and email address. **The email address is particularly important** because page proofs will be sent electronically as a PDF file to the corresponding author for checking (see 'page proofs' section below for more detail). Tables should fit on one page, be numbered consecutively with Arabic numerals, and be on a separate sheet. Every figure and table should be mentioned at least once in the text. A detailed guide to formatting is available on the *RAFS* homepage at journals.cambridge.org/raf

Submission of Manuscripts. Please submit manuscripts via our manuscript submission and tracking site, www.edmgr.com/rafs.

Full instructions for electronic submission are available directly from this site and from journals.cambridge.org/raf. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

When submitting manuscripts authors will need to supply:

- Manuscript file.
- Covering letter, stating that the manuscript is an original contribution that has not been published elsewhere in substantially the same form, that it is not currently under consideration elsewhere, and that permission has been obtained for any copyrighted material used.

Copyright. Papers are accepted on the understanding that the work has been submitted exclusively to the Journal. Authors will be supplied with a transfer of copyright form with their proofs, this must be completed and returned to the publisher. Papers will not be published until the signed copyright disclaimer has been received.

Page Proofs. Once typeset, the corresponding author will receive page proofs by email as a PDF file. You will be asked to print the PDF proof and mark any corrections to the print-out before mailing back to the proofreader. Alternatively, if you have no corrections or very few they can be returned to the proofreader by email. Full instructions will be sent with the page proofs.

Offprints. Authors are sent a PDF file of the final version of the article. Authors will be e-mailed an offprint order form along with the PDF proof.

A Final Note

Articles will be considered for publication in the *RAFS* only when submitted formally, in their final form, and formatted to the style of *RAFS*.

Renewable Agriculture and Food Systems

Volume 25 Number 1 March 2010

Special Issue

"Food for Life": Looking Beyond the Horizon

Charles Francis, John Doran, and the Editorial Team

Editorial

'Food for Life': Looking beyond the horizon 1

Commentary

Conventional research on controversial issues: an exercise in futility?
Charles A. Francis 3

Preliminary Report

Physical weed control in protected leaf-beet in central Italy
Michele Raffaelli, Marco Fontanelli, Christian Frascioni, Marco Ginanni, and Andrea Peruzzi 8

Research Papers

Evaluating marketing channel options for small-scale fruit and vegetable producers
M.N. LeRoux, T.M. Schmit, M. Roth, and D.H. Streeter 16

Determining marketing costs and returns in alternative marketing channels
Shermain D. Hardesty and Penny Leff 24

A contingent valuation analysis to determine profitability of establishing local organic wine markets in Spain
M. Brugarolas, L. Martinez-Carrasco, R. Bernabeu, and A. Martinez-Poveda 35

Vitamins A, E and fatty acid composition of the eggs of caged hens and pastured hens
H.D. Karsten, P.H. Patterson, R. Stout, and G. Crews 45

Is conventional agricultural research fit for the purpose of supporting ecological agriculture?
A case study of an attempted transition in Sweden
Karin Eksvärd 55

Review Article

Green food industry in China: development, problems and policies
Ling Lin, Deyi Zhou, and Caixue Ma 69
