When this article was published in *Psychological Medicine*, it contained an error in the following paragraph of text:

In the analysis of responder rates on observed values, 25 participants (60%) were classified as responders in the CIPE group at week 3, compared to 11 (23%) in the control group (RR = 2.54, $\chi^2 = 12.01$, $p = 0.0005$). At week 7, 38 (75%) participants were classified as responders in the CIPE group compared to 20 (40%) in the waiting list control group (RR = 1.9, $\chi^2 = 12.95$, $p = 0.003$).

The correct text is as follows:

In the analysis of responder rates on observed values, 26 participants (59%) were classified as responders in the CIPE group at week 3, compared to 12 (24%) in the control group (RR = 2.46, $\chi^2 = 11.97$, $p = 0.0005$). At week 7, 31 (72%) participants were classified as responders in the CIPE group compared to 18 (38%) in the waiting list control group (RR = 1.92, $\chi^2 = 10.92$, $p = 0.001$).

The authors apologise for this error.
