

Get specialty beryllium prototypes with production processing in mind.

Driven to perform? Come to us. We'll put the metal to the metal.

When your production schedule is short, you want to get it done right the first time. You can eliminate a major uncertainty when you entrust your custom beryllium fabrication, joining and coating to us. We'll help you shine.

Here's what we can do for you:

- Depend on us as the only fully integrated source for beryllium sheet and foil products. All critical operations are performed in-house for seamless excellence.
- We're your partner in joining and coating metals. When your project involves joining a metal to a metal, you can count on us.
- Come to us for all your UHV beryllium product needs: x-ray windows, chambers, beam pipes and more.
- Rely on our expert engineering. We like challenges. Taking your design concept into reality would be our pleasure.

Count on us for your tough jobs. Keep in mind that we're the only fully integrated source for beryllium products for the analytical, medical, and scientific industries. Challenge us with your "cutting edge" requirements. We look forward to hearing from you.

XRD TUBES

SEIFERT

- Extra large and extra thin Be-window for a high intensity X-ray beam, specially suited for long fine focus applications.
- Razor sharp focal spots ensure beam brilliance.
- Spectral purity
- Efficient cooling system for extended anode life.
- Full line of tubes
5 different focal spots,
7 different target materials,
2 different anode lengths,
compatible with European style towers.
- Designed and manufactured under ISO 9001 standards.
Backed by a world wide warranty of 2500 hrs.

DIN ISO 9001 / EN 29001

- World wide fast and friendly service, available through SEIFERT authorized service stations and re-sellers.

X-Ray Excellence...

...Coming Together Around the World

ARL and Scintag are proud to announce
the new

SCINTAG Xtra

The latest generation of XRD systems

- Theta: Theta configuration to facilitate sample preparation and handling
- Peltier cooled solid state detector (high count rates, KB suppression, no need for filters and monochromators)
- High precision goniometer with integrated closed loop servomotors for enhanced reliability and accuracy
- Powerful multitasking software features under Windows NT™

Scintag, innovation and leadership in X-Ray Diffractometry
