

**Errata and Addendum**

*August 1967 (Vol.XVIII, Part 3)*

In the paper by M. R. Head and N. Hayasi, “Approximate calculations of the incompressible laminar boundary layer”, some of the proof corrections requested by the authors were, through editorial error, omitted from the printed copy. In addition, the authors have since asked for an Addendum to be included.

The Addendum reads as follows:

“It is noted that the latest calculation by an improved finite-difference method gives a separation position of 1:314, replacing the previous value of 1:317. Further, it has been found that applications of the first- and second-order Shanks transformations to the Falkner-series solution give separation positions of 1:321 and 1:323, respectively. Details of these calculations will be reported in forthcoming papers.”

The text should be amended as follows:

Page 261 (line 3) Replace “with the use of 8 terms in the Blasius series solution” by “with the use of 9 terms in the Falkner's series solution”.

Page 261 (line 4) Replace “1:4, with 17 terms at $\xi=1:36$” by “$1:40$, with 18 terms at $\xi=1:36$”.

Page 265 (last line) Replace “Blasius series 1:340” by “Falkner series 1:34”.

Page 267 (last line) The expression for $a/a_0$ should be “$a/a_0 = [1 + 3\cdot2\{(1-(1-\xi^2))\}]^{1/2}$”.

Page 271, Table I (1st column) Replace “0:855” in first line by “0:0855”.

(4th column) Replace “0:0373” in fifth line by “0:0273”.

(3rd column) Insert “$f < 0$” in the 17th line.
